Preamble

Purpose. To establish a highly synchronized, granular timeline for the 60-day nuclear negotiating window (Phase II of *The Final Steps Accord* or equivalent framework), where every economic relief measure, sanctions waiver, and military de-escalation step is dynamically paired with an exact, verified nuclear milestone. This reciprocal sequencing provides both parties with the political cover necessary to demonstrate that no side is front-loading concessions or receiving benefits without corresponding performance.

Background. The current MoU provides a 60-day window to negotiate "how to dispose of Iran's highly enriched uranium and how to address Iranian enrichment." The United States will discuss sanctions relief and frozen asset releases. However, the sequencing is not specified. Without a granular, reciprocal schedule, the risk is that one side will perceive the other as receiving benefits without delivering corresponding commitments — potentially collapsing the framework during the most fragile period of implementation.

Modularity Clause. *This Annex is self-contained and may be incorporated into any existing or future agreement between the Parties by a single sentence of adoption. It does not amend or supersede conflicting provisions of any parent framework unless the Parties explicitly so agree. In the event of inconsistency, this Annex governs with respect to the sequencing and pairing of economic relief measures, military de-escalation steps, and nuclear verification milestones.*

Article 1: Definitions

"Nuclear Milestone" — A specific, verifiable action by Iran related to its nuclear program, including but not limited to:

- IAEA verification of a specified percentage of HEU inventory (e.g., 25%, 50%, 75%, 100%)
- IAEA installation of continuous monitoring equipment at a declared facility
- Commencement of downblending under Pathway A (in-country)
- Transfer of HEU to Oman under Pathway B
- Completion of a Joint Damage Assessment (per Annex O)
- Recovery or verification of damaged HEU cylinders (per Annex P)
- Any other milestone agreed by the Parties

"Economic Relief Measure" — A specific, verifiable action by the United States or its partners, including but not limited to:

- Release of a specified tranche of frozen assets
- Issuance of a sanctions waiver for a specific sector (e.g., oil, petrochemicals, banking)
- Reconnection of a specified number of Iranian banks to SWIFT
- Reduction or suspension of a specific sanctions designation
- Any other relief measure agreed by the Parties

"Military De-escalation Step" — A specific, verifiable action by either Party related to military posture, including but not limited to:

- Further reduction of the naval blockade or stand-off distances
- Withdrawal of a specified number of naval vessels
- Reduction of aerial surveillance or reconnaissance flights
- Any other de-escalation measure agreed by the Parties

"Verification Step" — A specific, verifiable action by the IAEA or other designated verification body, including but not limited to:

- Installation of continuous monitoring equipment
- Submission of a verification report to the JIG
- Completion of an inventory or damage assessment
- Certification of compliance with a specified milestone

"No Surprises Notification Period" — The 48-hour period prior to any unilateral announcement of a measure under this Annex, during which the announcing Party must

notify the JIG and the other Party of its intent.

Article 2: The 60-Day Reciprocal Sequencing Schedule

The following tables establish the default reciprocal pairings for the 60-day window. The Parties may adjust the timing or pairings by mutual written agreement through the JIG, but no adjustment may reduce the reciprocity or create a significant imbalance in delivered value.

Cross-reference: Adjustments are governed by Article 5. The default schedule remains in force unless and until the Parties mutually agree to an alternative.

Week 1 (Days 1–7): Baseline Establishment

Table S-1: Week 1 Reciprocal Pairings — Baseline Establishment

Day	Economic Relief / Military Step	Nuclear / Verification Milestone
1	US releases first asset tranche (5% of frozen assets, approximately \$5B) to Swiss escrow	Iran grants IAEA immediate access to all declared sites (per Annex O, Article 1)
3	US suspends enforcement of secondary sanctions on Iranian oil sales to pre-approved customers (China, India, Turkey, Japan)	IAEA begins joint damage assessment (per Annex O, Article 2)
5	US reduces naval blockade perimeter by 25%	IAEA confirms installation of continuous monitoring at Natanz
7	US issues OFAC general license for humanitarian trade (medicine, food, medical equipment)	Iran provides IAEA with complete inventory of HEU cylinder locations and damage data (per Annex P, Article 1)

Week 2 (Days 8–14): Inventory Verification

Table S-2: Week 2 Reciprocal Pairings — Inventory Verification

Day	Economic Relief / Military Step	Nuclear / Verification Milestone
8	US releases second asset tranche (10% cumulative, total \$10B released)	IAEA confirms physical verification of 25% of HEU cylinders as intact and accounted for
10	US further reduces naval blockade perimeter by an additional 25% (50% cumulative reduction)	IAEA confirms installation of continuous monitoring at Fordow

12	US issues sanctions waiver for petrochemical exports	Iran and IAEA complete joint damage assessment (per Annex O, Article 2)
14	US releases third asset tranche (15% cumulative, total \$15B released)	IAEA confirms physical verification of 50% of HEU cylinders as intact and accounted for

Week 3 (Days 15–21): Access and Recovery

Table S-3: Week 3 Reciprocal Pairings — Access and Recovery

Day	Economic Relief / Military Step	Nuclear / Verification Milestone
15	US withdraws 25% of naval vessels from the Gulf region	IAEA confirms installation of continuous monitoring at Esfahan damaged areas (remote sensing permitted)
17	US releases fourth asset tranche (20% cumulative, total \$20B released)	IAEA confirms recovery or verification of damaged cylinders (per Annex P, Article 3) or commencement of in-situ monitoring
19	US issues sanctions waiver for automotive and metals trade	Iran commits in writing to Pathway A (in-country downblending) as default or selects alternative pathway
21	US releases fifth asset tranche (25% cumulative, total \$25B released)	IAEA confirms physical verification of 75% of HEU cylinders as intact and accounted for

Week 4 (Days 22–28): Downblending Commencement

Table S-4: Week 4 Reciprocal Pairings — Downblending Commencement

Day	Economic Relief / Military Step	Nuclear / Verification Milestone
22	US further withdraws an additional 25% of naval vessels (50% cumulative withdrawal)	IAEA confirms installation of downblending equipment at Esfahan
24	US releases sixth asset tranche (30% cumulative, total \$30B released)	Iran commences downblending of first 25% of accessible HEU cylinders under IAEA supervision
26	US issues sanctions waiver for gold and precious metals trade	IAEA confirms continuous monitoring of downblending operations
28	US releases seventh asset tranche (35% cumulative, total \$35B released)	IAEA confirms downblending of 25% of HEU stockpile to medical-grade LEU or lower

Week 5 (Days 29–35): Mid-Point Verification

Table S-5: Week 5 Reciprocal Pairings — Mid-Point Verification

Day	Economic Relief / Military Step	Nuclear / Verification Milestone
29	US reduces overflights and surveillance missions by 25%	IAEA confirms installation of continuous monitoring at all declared sites (100% completion)
31	US releases eighth asset tranche (40% cumulative, total \$40B released)	IAEA confirms physical verification of 100% of HEU cylinders (all accessible material accounted for)
33	US issues sanctions waiver for banking and financial services (Phase 1 SWIFT reconnection)	IAEA confirms downblending of 50% of HEU stockpile
35	US releases ninth asset tranche (45% cumulative, total \$45B released)	Iran provides written affirmation of permanent non-proliferation commitment (Nuclear Dignity Doctrine)

Week 6 (Days 36–42): Advanced Verification

Table S-6: Week 6 Reciprocal Pairings — Advanced Verification

Day	Economic Relief / Military Step	Nuclear / Verification Milestone
36	US further reduces overflights by an additional 25% (50% cumulative reduction)	IAEA confirms downblending of 60% of HEU stockpile
38	US releases tenth asset tranche (50% cumulative, total \$50B released)	Iran permits IAEA complementary access inspections under Additional Protocol authority
40	US issues full SWIFT reconnection authorization (Phase 2)	IAEA confirms downblending of 75% of HEU stockpile
42	US releases eleventh asset tranche (55% cumulative, total \$55B released)	IAEA confirms no diversion of fissile material; environmental sampling clean

Week 7 (Days 43–49): Final Downblending

Table S-7: Week 7 Reciprocal Pairings — Final Downblending

Day	Economic Relief / Military Step	Nuclear / Verification Milestone
43	US withdraws remaining naval vessels to pre-crisis posture (100% of agreed withdrawal)	IAEA confirms downblending of 85% of HEU stockpile
45	Day 45 Circuit Breaker (per Addendum A-1) — If no agreement on final disposition, Pathway A default activates	IAEA confirms downblending of 90% of HEU stockpile

47	US releases twelfth asset tranche (60% cumulative, total \$60B released)	IAEA confirms downblending of 95% of HEU stockpile
49	US issues full sanctions relief for all nuclear-related sanctions	IAEA confirms downblending of 100% of HEU stockpile to medical-grade LEU or lower

Week 8 (Days 50–60): Close-Out

Table S-8: Week 8 Reciprocal Pairings — Close-Out

Day	Economic Relief / Military Step	Nuclear / Verification Milestone
50	US releases thirteenth asset tranche (65% cumulative, total \$65B released)	IAEA issues interim compliance certification
55	US releases fourteenth asset tranche (70% cumulative, total \$70B released)	JIG convenes final 60-day review conference
60	US releases remaining asset tranches (up to 100% cumulative, approximately \$100B total)	IAEA issues full 60-day compliance certification; Phase III permanent architecture negotiations begin

Cumulative Progress Summary

Table S-9: Cumulative Progress Milestones by Week

Week	Cumulative Asset Release	Cumulative HEU Verification	Cumulative Downblending	Military De-escalation
Week 1	5% (~\$5B)	Access granted; damage assessment begun	—	Blockade -25%
Week 2	15% (~\$15B)	50% cylinders verified	—	Blockade -50%
Week 3	25% (~\$25B)	75% cylinders verified	—	Vessels -25%
Week 4	35% (~\$35B)	All accessible material verified	25% downblended	Vessels -50%
Week 5	45% (~\$45B)	100% cylinders verified	50% downblended	Overflights -25%
Week 6	55% (~\$55B)	Full inventory + AP access	75% downblended	Overflights -50%

Article 2: The 60-Day Reciprocal Sequencing Schedule

Week 7	60% (~\$60B)	No diversion confirmed	100% downblended	Full withdrawal
Week 8	100% (~\$100B)	Full compliance certification	100% certified	Pre-crisis posture

Article 3: No Surprises Notification Protocol

No Party may announce or implement any unilateral economic relief measure, military de-escalation step, or nuclear milestone without providing 48 hours' advance notice to the JIG and the other Party through the back-channel de-confliction mechanism (per Annex R, Article 3).

The notification must include:

- The specific measure or milestone to be announced or implemented
- The anticipated date and time of announcement or implementation
- The reciprocal measure expected from the other Party (if applicable)
- Any technical or logistical details necessary for verification

If a Party announces or implements a measure without providing 48 hours' notice:

- The measure shall not count toward the reciprocal sequencing schedule
- The JIG shall issue a notice of non-compliance to both Parties
- The non-notifying Party shall provide a written explanation to the JIG within 24 hours
- Repeated violations (two or more within any 30-day period) shall constitute a Tier 2 material breach

Emergency Exception: If a measure is required to respond to an imminent threat to safety or security, the 48-hour notice period may be waived, but the Party must notify the JIG and the other Party simultaneously with implementation and provide an explanation within 6 hours.

Article 4: Verification and Compliance

Each nuclear milestone shall be verified by the IAEA before the corresponding economic relief measure or military de-escalation step is implemented.

The IAEA shall provide a verification report to the JIG within 24 hours of milestone completion.

The JIG shall certify compliance to both Parties within 12 hours of receiving the IAEA report.

If a nuclear milestone is not verified on schedule:

- The corresponding economic relief measure or military step shall be delayed until verification is complete
- The JIG shall convene an emergency session within 48 hours to assess the cause of the delay
- Delays caused by technical or logistical issues (per Annex O, Annex P) shall not constitute breach
- Delays caused by bad-faith obstruction shall be treated as a Tier 2 material breach

Cross-reference: Tier classifications are defined in Annex R, Article 4. Technical delay procedures are detailed in Annex O (Article 6) and Annex P (Article 4). The JIG emergency session protocol is set out in Annex R, Article 2.

Article 5: Adjustment Mechanism

The Parties may adjust the timing or pairings of the reciprocal sequencing schedule by mutual written agreement through the JIG.

Adjustments must preserve the overall reciprocity of the schedule and may not create a significant imbalance in delivered value.

Any adjustment shall be reflected in an updated schedule published by the JIG within 24 hours of agreement.

If the Parties cannot agree on an adjustment, the default schedule in Article 2 shall remain in force.

Adjustment criteria:

- Adjustments may be requested by either Party at any time
- The requesting Party must submit a written proposal to the JIG with justification
- The other Party shall respond within 72 hours
- Silence shall be construed as non-consent; the default schedule remains operative
- Emergency adjustments may be approved by the JIG on an interim basis pending Party confirmation

Article 6: Incorporation by Reference

This Annex may be incorporated into any existing or future agreement between the Parties by the following sentence:

"The Parties adopt Annex S (60-Day Reciprocal Sequencing Schedule) as an operative provision of this Agreement. In the event of any inconsistency, Annex S shall govern with respect to the sequencing and pairing of economic relief measures, military de-escalation steps, and nuclear verification milestones during the 60-day nuclear negotiating window."

No further amendment of the parent framework is required. This Annex enters into force upon the later of:

- Signature by both Parties; or
- The effective date of the parent framework into which it is incorporated.

Article 7: Provisional Application

The Parties may agree to apply this Annex provisionally for a period of 90 days, pending formal ratification or incorporation into a parent framework.

- Provisional application shall be effected by an exchange of diplomatic notes.
- During provisional application, all provisions of this Annex shall be operative and binding.
- Either Party may terminate provisional application with 14 days' written notice.

Note: Provisional application under this Article is symmetric — either Party may initiate termination, and neither Party is locked into indefinite provisional obligations without a path to formalization.

Article 8: Severability

If any provision of this Annex is found by a court of competent jurisdiction or arbitral panel to be unenforceable, the remaining provisions shall remain in full force and effect.

The Parties shall promptly negotiate a replacement for any provision found unenforceable, preserving the original intent to the maximum extent possible.

Article 9: Duration and Withdrawal

This Annex shall remain in force indefinitely, unless:

- Both Parties agree in writing to terminate it; or
- The parent framework into which it is incorporated terminates, and the Parties do not reaffirm this Annex within 90 days of such termination.

Withdrawal from this Annex without withdrawal from the parent framework is not permitted. This Annex is integral to the reciprocal sequencing architecture and may not be severed unilaterally.
