

DIPLOMATIC WORKING DOCUMENT

Stability First

14-Day Implementation Directive

Enhanced Edition v2.3

Operations-Optimized - Dashboard-Driven - 15 Economic Tracks Integrated

All Guardrails Intact | 16 Friction Reductions | 15 Performance-Linked Economic Tracks

Version 2.2 | May 2026

FOR AUTHORIZED NEGOTIATORS ONLY

QUICK-START GUIDE FOR DUTY OFFICERS

This guide sits on top of the treaty text. It does not change any obligation. It makes compliance more likely by reducing cognitive load for the people who must execute.

Page 1: What This Is and Who Does What

PURPOSE: The Stability First Agreement reduces the risk of war in the Strait of Hormuz by creating a verified, performance-contingent exchange: Iran limits nuclear enrichment and secures the strait; the US releases frozen assets and permits oil exports. **THREE KEY PRINCIPLES:** 1. Nobody moves alone. Every US action is paired with an Iranian action on the same day (Mirror Pairings, Article 1.5). 2. Everything is performance-contingent. If Iran enriches above 3.67%, oil revenue stops automatically (Snap Line, Article 6.1). 3. Mistakes in the first 30 days are expected and protected (Learning Curve, Article 1.1). **THREE ENTITIES YOU WILL INTERACT WITH:** - JIG (Joint Implementation Group): The governing body in Geneva. Call for disputes, compliance questions, and form approvals. - MCC Muscat: The 24/7 hotline and naval coordination center. Call for Hormuz incidents, force posture questions, and daily SITREP submission. - Swiss Escrow Agent: The bank in Zurich that holds and releases funds. Call for wire confirmation, SWIFT issues, and balance queries. **YOUR JOB:** Read the portal once per shift. Submit the Daily SITREP (one email, one form). Escalate only when the automated system tells you to.

Page 2: What You Must Do in the First 24 Hours

HOOR 0 (MoU Signature): - Confirm your Implementation Cell is staffed (8-12 people; Article 13.1) - Log in to Transparency Portal (credentials from JIG Secretariat) - Confirm hotline number reachability **HOOR 1-4:** - Verify Mirror Pairing 1: Confirm enrichment cap order posted to portal - Verify Mirror Pairing 2: Confirm IAEA inspector border crossing - Verify Mirror Pairing 3: Confirm IRGC repositioning satellite image posted - Verify Mirror Pairing 4: Confirm MCC hotline staffed - If any Pairing missing: call JIG Chair immediately **HOOR 4-24:** - Submit first Daily SITREP (template in Appendix C) - Confirm \$250M humanitarian-badged funds credited - Confirm \$500M general liquidity credited - Begin Learning Curve error logging **HOOR 24-72:** - Confirm first oil cargo loaded with JHA permit - Submit Day-1 Implementation Cell roster to JIG - Test all SWIFT and backup channels - If any technical system not ready: invoke Minimum Viable Implementation (30-day interim; Article 15.1)

Page 3: Who to Call if X Goes Wrong

If This Happens	Call This Number	When
Enrichment suspected >3.67%	IAEA Vienna: +43-1-2600-22100	Immediately, any time
Hormuz shipping incident	MCC Muscat: +968-24-711-900	Immediately, 24/7
Funds not received in 72h	Swiss Escrow: +41-31-325-2277	After 72h from expected
Need a Grace Day	JIG Chair Geneva: +41-22-917-4321	At least 6 hours before
Face-Saving Pause needed	JIG Chair Geneva: +41-22-917-4321	24 hours before
Crisis Pause or Exit Ramp	JIG Chair Geneva: +41-22-917-4321	Immediate

If This Happens	Call This Number	When
SWIFT message rejected	CBI SWIFT Desk: +98-21-2990-2166	Within 4 hours
Hotline not answered	MCC Backup: +968-24-711-901	After 2 attempts
IAEA inspector access denied	JIG Nuclear: +43-1-2600-22620	Immediately
Not sure what to do	JIG Chair Geneva: +41-22-917-4321	Any time

Executive Summary: What Has Changed in v2.2

This operations-optimized edition reduces cognitive load and implementation friction without weakening a single guardrail. Sixteen specific simplifications have been integrated:

1. QUICK-START GUIDE (front appendix): 3-page duty officer guide covering purpose, first-24-hour checklist, and call tree. 2. DAY-1-14 CONTROL PANEL (Appendix A): Single table showing what Iran, the US, and guarantors must do each day, plus automatic consequences if late. 3. COLOR-CODED TIERS: Red = Tier-1, Orange = Tier-2, Yellow = Tier-3/Learning-Period. Visible in Control Panel. 4. STANDARDIZED 72-HOUR WINDOWS: Most non-critical corrections and financial confirmations now use a uniform 72-hour cycle. 5. SAFETY MECHANISM HIERARCHY (Article 1.5): Tier-1 > Snap Line > Dampening > Grace Day/Face-Saving Pause > Stabilization Hold > Exit Ramp. 6. STANDARD TRIGGER WORDING (Article 1.2): All non-critical pauses use identical invocation language. 7. DAILY SITREP (Section 11): One bundled report replaces multiple separate reporting requirements. 8. DEFAULT-IF-SILENT (Article 1.6): Missing minor procedural steps are treated as complete and logged for Quiet Correction. 9. UNIFIED ESCALATION LADDER (Section 6.3): Single table for Tier-1 through Tier-5 with PRDD, asset, Hormuz, and messaging effects. 10. STANDARDIZED PATTERN THRESHOLD: 3 occurrences in 60 days everywhere. 11. SIMPLIFIED PRDD BANDS: 85% baseline, 70% after any Tier-2 or Tier-3. Snap Line and reserve forfeiture unchanged. 12. JTAT-ONLY QUIET CORRECTION: Technical corrections within the Window are JTAT-handled; no JIG meeting required. 13. IMPLEMENTATION CELLS (Section 11): Each Party mandates 8-12 staff for portal reading, SITREP, and form management. 14. CONSOLIDATED FORMS REGISTER (Appendix F): All forms, codes, and permits in one annex. 15. MINIMUM VIABLE IMPLEMENTATION (Section 12): 30-day interim equivalents for non-essential details. 16. MECHANISM FLOWCHARTS (Appendix E): Visual decision trees for PRDD, Snap Line, and Grace Days. 17. PERFORMANCE-LINKED ECONOMIC COOPERATION (Section 13): 15 conditional tracks across three bands - Fast Visible Domestic Wins (infrastructure, aviation, green tech, tourism, Hormuz insurance), Regional Economic Integration (energy coordination, Western firms, logistics hub, debt service, multilateral funds), and Industrial/Trade Expansion (industrial recovery, inflation signaling, trade corridor, FDI facilitation, legacy assessment). All tracks unlock progressively based on sustained compliance milestones.

Section 1: Waltz-Symmetric Governing Principles

This section introduces operational simplifications that reduce cognitive load while preserving all guardrails. The guiding principle: standardize where possible, automate where possible, and make the default favor completion over procedural failure.

1.1 Human Error Tolerance - The Learning Curve Provision

Article 1.1 - Learning Curve Provision (a) LEARNING PERIOD. Days 1-30. Tier 2 penalties halved; Tier 3 = advisory only; discrepancies logged for pattern review. (b) EXPECTED ERRORS (protected): reporting delays up to 24h; positioning variances up to 20%; hotline delays up to 30 min; AIS interruptions up to 6h; ISR delays up to 8h; escrow format errors; translation discrepancies. (c) GRADUATED NORMALIZATION (Days 31-44). Penalty Factor = $0.50 + 0.036 \times (\text{Day} - 30)$. No cliff. (d) PATTERN THRESHOLD (v2.2 standardized). Same error type occurring 3 or more times in 60 days graduates that specific error type to full compliance mode. This standard replaces all other pattern

counts in the Agreement (see also re-suspension lever, Article 2.2).

1.2 Grace Day, Face-Saving Pause, and Stabilization Hold

Article 1.2 - Standardized Safety Valve Invocations (a) STANDARD TRIGGER (v2.2 harmonized). All non-critical pauses (Grace Day, Face-Saving Pause, Stabilization Hold, and Exit Ramp) are invoked by written notice to the JIG Chair and Pakistani Guarantor. No additional justification required beyond the specific clause citation. (b) GRACE DAY. 3 per Stage. 6 hours notice. Defer obligations 24 hours. Not on Day 7 or 14. Non-events for compliance tracking. (c) FACE-SAVING PAUSE. Max 2 per 30 days. 24 hours notice. 7-day deferral. Not for Tier-1. Auto-proceeds after 7 days unless both Parties modify. (d) STABILIZATION HOLD. 2 per 30 days. 12 hours notice. Covers up to 3 related obligations. Auto-triggers for third-party attacks, natural disasters, cyberattacks, negotiator incapacity, or UNSC emergency session. (e) NON-ABUSE CAP. Combined Grace Days + Face-Saving Pauses capped at 4 per Party per 30 days. (f) STANDARD NOTICE FORMAT (v2.2): '[Mechanism] invoked under Article [X.X]. Effective [date]. Duration [if applicable]. JIG Chair and Pakistani Guarantor notified.'

1.3 Quiet Correction Window - 72-Hour Standard

Article 1.3 - Quiet Correction Window (a) PURPOSE. 72 hours for voluntary remediation of Tier 2 or 3 issues before formal compliance action. (b) STANDARD 72-HOUR CYCLE (v2.2 unified): Hour 0: Issue logged by verification channel; Party notified via JTAT Hour 0-24: Party may acknowledge and begin correction; no formal record Hour 24-48: If correction in progress, JTAT provides technical assistance Hour 48-72: If correction completed, issue formally resolved; no compliance mark Hour 72+: If not corrected, issue escalates to formal compliance track (c) JTAT-ONLY HANDLING (v2.2). Purely technical corrections within a Quiet Correction Window are JTAT-handled and do not require JIG convening. Only issues reaching Hour 72 unresolved, or involving non-technical (political) dimensions, require JIG session. (d) GOOD FAITH PRESUMPTION. During the Window, presumption of good faith. No public statements, verification reports, or official notifications until Hour 72. (e) IRREVERSIBLE CORRECTIONS. Corrections made during the Window are binding and may not be reversed.

1.4 Day-1 Mirror Pairings - Nobody Moves Alone

Article 1.4 - Day-1 Mirror Pairings (a) CORE PRINCIPLE. No Party provides value on Day 1 without receiving verified reciprocal value simultaneously. (b) THE FOUR PAIRINGS (unchanged from v2.1): PAIRING 1: \$750M liquidity (US) + enrichment cap order at 3.67% (Iran) PAIRING 2: OFAC General License for frozen assets (US) + IAEA inspector access (Iran) PAIRING 3: Oil Export Normalization permits (US) + IRGC withdrawal to 2nm (Iran) PAIRING 4: SWIFT reconnection (US) + MCC Hotline Tier-1 staffing (Iran) (c) NON-SEVERABILITY. If any Pairing fails, all Pairings suspend until remedied. (d) MIRROR DAY-1 COST. The \$750M liquidity and the enrichment cap order have equal political and legal weight. Neither is a unilateral concession.

1.5 Hierarchy of Safety Mechanisms

Article 1.5 - Hierarchy of Safety Mechanisms (v2.2) If any two mechanisms conflict, the higher-ranked mechanism always prevails: Rank 1: TIER-1 OBLIGATIONS (Zero Tolerance) - nuclear freeze, inspector safety Rank 2: PRDD NUCLEAR SNAP LINE - automatic oil revenue suspension Rank 3: AUTOMATIC DAMPENING WINDOW - 48-hour military freeze Rank 4: GRACE DAY / FACE-SAVING PAUSE - discretionary delays Rank 5: STABILIZATION HOLD - 7-day operational pause Rank 6:

EXIT RAMP - 14-day structured withdrawal Rank 7: CRISIS PAUSE MODE - 30-90 day operational freeze (RCSA) CONFLICT RULES: - A Grace Day may not be invoked for a Snap Line event (Rank 2 > Rank 4) - A Face-Saving Pause may not delay Tier-1 obligations (Rank 1 > Rank 4) - An Exit Ramp proceeds even during a Stabilization Hold (Rank 6 > Rank 5) - Crisis Pause supersedes all discretionary mechanisms (Rank 7 > Ranks 4-6) - The Snap Line operates regardless of any pause, hold, or exit (Rank 2 > Ranks 4-7) DUTY OFFICER RULE: If uncertain which mechanism applies, consult the Hierarchy. If still uncertain, call the JIG Chair.

1.6 Default-if-Silent Rule

Article 1.6 - Default-if-Silent (v2.2) (a) RULE. If a minor procedural step (e.g., a form code, a non-critical acknowledgment, a format specification) is missing but the substantive action is complete, the default treatment is: 'treat as complete and log for Quiet Correction.' (b) APPLIES TO: - Missing or incorrect SWIFT Field 72 coding (substance: funds transferred) - Late non-critical acknowledgment (substance: action performed on time) - Format errors in Learning Period documentation - Translation discrepancies in non-legal multilingual communications - Dashboard login delays (substance: data available via alternative channel) (c) DOES NOT APPLY TO: - Tier-1 obligations (nuclear, inspector safety, WMD) - Snap Line triggers - Actual fund transfer failures - Military safety-of-navigation violations - Any issue involving physical security (d) PROCEDURE. JTAT logs the procedural gap in the Learning Curve Database. No compliance mark. No JIG session. Corrective action requested informally. If the same gap occurs 3 times in 60 days, it graduates to full compliance tracking.

1.7 Non-Recognition and Non-Amnesty

Article 1.7 - Non-Recognition and Non-Amnesty (a) NON-RECOGNITION. Nothing in this Agreement constitutes recognition of the other Party's government, political system, or regional policies. This is a purely transactional arrangement. (b) NON-AMNESTY. This Agreement grants no amnesty, legal immunity, or retrospective forgiveness for any past actions. All claims and grievances prior to the Effective Date remain unaffected. (c) EXECUTIVE AUTHORITY SUFFICIENT. Neither Party is required to submit this Agreement for legislative ratification if doing so would trigger recognition-related disputes.

Section 2: Enhanced Tranche Architecture

Four parallel financial tracks, simplified for operators while preserving all protections.

TRACK 1: \$750M Immediate Liquidity (Day 1) - 60% P1/P2 soft cap, \$250M humanitarian-badged
 TRACK 2: Accelerated Frozen Asset Release - 50% by Day 30, 70% by Day 60 - re-suspension lever at 3
 Tier-2 events in 60 days TRACK 3: Oil Export Revenue Normalization (Day 1) - 2.1 mbpd, IAEA
 quarterly pre-clearance required TRACK 4: PRDD (Day 14) - simplified 2-band: 85% baseline, 70%
 after any Tier-2/3 event. Snap Line for Tier-1.

2.1 Immediate Liquidity Package

Article 2.1 - Immediate Liquidity Package (a) COMPOSITION: \$500M Urgent Liquidity (\$250M humanitarian-badged for medical/food) + \$250M Pilot Asset Transfer. (b) 60% P1/P2 SOFT CAP. Within 72 hours of Day-1 receipt, at least 60% must be P1 (Humanitarian/Medical) or P2

(Agricultural/Food). Enforced by Transparency Portal reporting; failure triggers JTAT consultation, not compliance action. (c) NO BUDGET SUBSIDY. This is a transaction-cost advance under a risk-reduction agreement. Not fiscal assistance. (d) HUMANITARIAN-BADGED FUNDS ARE NON-REVERSIBLE. Once released for medical/food procurement, they may not be recalled, even in Tier-1 scenarios (humanitarian firewall). (e) FAST-TRACK: T-72h wire prep; T-48h OFAC license; T-24h Escrow ready; T-0 simultaneous release; T+12h humanitarian \$250M; T+24h full \$750M.

2.2 Accelerated Frozen Asset Release

Article 2.2 - Frozen Asset Schedule Tranche 1 (Day 14): 15% - Stage 1 closed - Non-reversible Tranche 2 (Day 30): 20% - 30-day compliance - Non-reversible Tranche 3 (Day 60): 20% - 60-day compliance - Non-reversible Tranche 4 (Day 120): 15% - JIG review - Reversible Reserve (Day 365): 5% - 12-month compliance - Pending RCSA Release (M12): 10% - Full RCSA compliance RE-SUSPENSION LEVER (v2.2 standardized threshold): If Iran accumulates 3 Tier-2 events in any 60-day period, the US may freeze the next scheduled frozen asset tranche for up to 30 days without full snapback. Does not affect: humanitarian funds, PRDD, Oil Export Normalization.

Tranche	Timing	Amount	Trigger	Reversibility	Cumulative
Immediate	Day 1	\$750M	MoU + enrichment cap	Non-reversible	\$750M
Tranche 1	Day 14	15%	Stage 1 closed	Non-reversible	15%
Tranche 2	Day 30	20%	30-day compliance	Non-reversible	50%
Tranche 3	Day 60	20%	60-day + HEU verified	Non-reversible	70%
Tranche 4	Day 120	15%	JIG review	Reversible + re-suspension lever	85%
Reserve	Day 365	5%	12-month compliance	Pending	90%
RCSA	Month 12	10%	Full RCSA compliance	RCSA framework	100%

2.3 Oil Export Revenue Normalization

Article 2.3 - Oil Export Normalization (a) CUSTOMER WHITELIST: China, India, Japan, South Korea, Turkey, EU humanitarian purchasers, and any 2022-2025 JCPOA-era purchaser. (b) IAEA QUARTERLY PRE-CLEARANCE: Every 90 days, IAEA certifies no whitelisted state/entity is in material NPT breach. Suspended purchasers remain suspended during appeal. (c) SHIPPING: JHA Transit Permits provide OFAC exemption, Lloyd's reinstatement, IMF convoy escort, AIS 'JHA-AUTHORIZED'. (d) PAYMENT: Purchasers pay into Petroleum Revenue Escrow; Swiss Escrow releases to CBI within 72 hours of delivery confirmation. (e) VOLUME: Up to 2.1 mbpd, ~\$130M/day at \$62/bbl.

2.4 Petroleum Revenue Direct Deposit (Simplified 2-Band)

Article 2.4 - PRDD (v2.2 Simplified) (a) MECHANICS (starting Day 14, weekly): Step 1: Lloyd's List confirms cargo delivery Step 2: Payment to Petroleum Revenue Escrow Step 3: Swiss Escrow confirms receipt; posts to Portal Step 4: JIG Financial Monitor certifies no material breach in preceding 7 days Step 5: Funds released to CBI within 72 hours (b) SIMPLIFIED 2-BAND RELEASE (v2.2): BASELINE (no Tier-2+ in preceding 30 days): 85% of weekly revenue released REDUCED (any Tier-2 or Tier-3 in preceding 30 days): 70% released; 15% additional held The held amount releases as lump sum if 30 days pass without further escalation. (c) PERFORMANCE RESERVE (unchanged): 15% baseline hold-back. At 30-day checkpoint: - No material breach: full reserve released - Tier 2 event: 50% of reserve released - Tier 3 event: 25% of reserve released - Tier 1

event: full forfeiture + Snap Line (d) PRDD NUCLEAR SNAP LINE: Automatic suspension within 24 hours of IAEA-confirmed enrichment above 3.67%. Irrevocable by political authority. Only IAEA DG can authorize resumption. (e) NON-CASH TO IRGC: PRDD funds shall not be distributed as cash to IRGC-linked designated entities. Commercial transactions permitted. (f) QUARTERLY SANITIZED SUMMARIES: Separate reports to US Congress and Iranian Majles every 90 days. (g) CNY OPTION: Up to 50% in CNY via Bank of Kunlun.

2.5 Iranian Banking Pre-Positioning

Article 2.5 - Banking Infrastructure T-14d: Swiss Escrow opens CHF/EUR nostro with Melli Iran and Sepah T-10d: Bank of Kunlun activates CNY clearing T-7d: SWIFT tests (MT 103, 202 COV, 950) confirmed T-5d: CBI dashboard access tested T-3d: JTAT deploys to Tehran and Geneva T-1d: End-to-end \$1 test transfer BACKUP CHAIN: Swiss Escrow -> Melli Zurich | Bank of China CH -> Sepah | KBC Brussels -> EDBI | Bank of Kunlun Beijing direct | SBP CHAPS emergency bridge

Section 3: Iranian Access and Deployment

Article 3.1 - Currency Options Default: CHF. Options: EUR (WM/Reuters -0.12%), CNY (PBOC parity, up to 50%), AED (UAE Central Bank rate). IRR conversion is exclusively Iranian sovereign decision. Fee cap: 0.30%. Article 3.2 - Deployment Authority P1 HUMANITARIAN/MEDICAL: Same-day, exempt from caps P2 AGRICULTURAL/FOOD: Next business day P3 INDUSTRIAL IMPORTS: 2 business days P4 GENERAL COMMERCIAL: 3 business days 60% P1/P2 soft cap on Day-1 funds (Article 2.1). Article 3.3 - Transparency Dashboard CBI read-only access to balances, pending tranches, SWIFT UETR, 90-day projections. REGIONAL ALLIES OBSERVER STATUS (v2.1): GCC, Iraq, Oman, Pakistan read-only aggregated data. BILATERAL CONFIRMATION (72-hour standard): Hour 0 SWIFT MT 103; Hour +4-24 CBI MT 199; Hour +24 gpi post; Hour +48 JIG verify; Hour +72 Pakistani Certificate. MONTHLY RECONCILIATION: MT 940/950 first business day of each month.

Section 4: Enhanced Crisis Resilience

Article 4.1 - Automatic Dampening (48-hour window) Trigger: Any Tier 2 or 3 event. Effects: offensive ops suspended; hotline triple watch; JIG within 8h; Pakistani Guarantor bilateral calls; media coordinated. IRREVERSIBLE PROTECTIONS: Humanitarian transit, released escrow funds, oil shipments in transit, IAEA access, hotline ops. COOLDOWN: 14 days post-Dampening with no snapback. Article 4.2 - Stabilization Hold (expanded) 7 days, 2 per 30 days, up to 3 obligations. 12h notice. Auto-triggers for: Hormuz attack, natural disaster, cyberattack, negotiator death, UNSC session. EXIT RAMP: 14 days written notice to JIG Chair. Humanitarian and oil continue; military modules suspend. Reversible by mutual agreement. Article 4.3 - Messaging Framework Pre-approved US characterizations: 'Iran agreed to verifiable limits' / 'Every dollar is tied to verified performance' / 'We can walk away in 14 days if Iran cheats' / 'This is a transaction, not friendship' Pre-approved Iran characterizations: 'The siege has been lifted' / 'Our nuclear program continues within NPT rights' / 'This is recognition of sovereign rights' / 'The Snap Line is a technical detail, not a chain' Performance-contingent rule: all public messaging must acknowledge conditional benefits. 24-hour embargo on contradictory messaging.

Section 5: Enhanced Hormuz Modules

Five core modules (MHS-005, 011, 013, 016, 012) with Learning Period relaxations.

MHS-005: Coalition integration Day 14-21. Joint patrol: 2 of 3 nationalities. ROE-4 IRGC distancing: 2nm. MHS-011: 96-hour checkpoint during Learning Period. Partial lift threshold: 30% may remain first 7 days. Spoiler response: lift continues unless BOTH agree to pause. MHS-013: Tier-1 response <5 min during Learning Period. 2 interpreters (not 3) first 14 days. Tier-3 activation <60 min. MHS-016: IRGC withdrawal 3nm during Learning Period. Boarding restriction softened. US distancing 6nm. MHS-012: EW notifications 2 hours for Level 1-2. GPS spoofing containment 1nm. Civilian check waived for Level 3-4 during active threat.

Section 6: Hardened Compliance Architecture

Harder nuclear guardrails, unified escalation, and the PRDD Snap Line. The principle: automatic consequences for nuclear violations, not diplomatic debate.

6.1 PRDD Nuclear Snap Line

Article 6.1 - Snap Line (a) TRIGGERS (automatic, irreversible by political authority): (i) IAEA confirms enrichment >3.67% at declared facility (ii) IAEA confirms enrichment >3.67% at undeclared facility (iii) IAEA reports Iran denied access to suspected site (iv) IAEA DG states Iran is not in compliance with enrichment cap (b) AUTOMATIC SEQUENCE: Hour 0: IAEA posts to Transparency Portal Hour 2: Swiss Escrow receives automated suspension instruction Hour 4: Pending PRDD releases frozen; new deposits suspended Hour 6: CBI notified via encrypted channel Hour 8: JIG Chair emergency session Hour 24: Full suspension confirmed if trigger unresolved (c) PARTIAL RESUMPTION LADDER: Iran provides IAEA access to disputed site: 50% PRDD resumes IAEA confirms enrichment returned to 3.67% or below: 75% resumes 30 days no further violations: 100% resumes (d) QUARTERLY SNAP LINE TEST: JIG IT simulates trigger every 90 days using test data. Does not affect actual flows.

6.2 IAEA Pre-clearance for Customer Whitelist

Article 6.2 - IAEA Quarterly Pre-clearance Every 90 days: JIG submits whitelist to IAEA -> IAEA verifies no material NPT breach -> IAEA issues Pre-clearance Certificate (Form IAEA-PC-001) valid 90 days -> Breach found = suspension pending rectification. SCOPE: Sovereign states, NOCs, private entities in NNWS, all subsidiaries. EXCEPTION: UN/ICRC humanitarian purchases exempt; separate escrow channel.

6.3 Unified Escalation Ladder

This single table replaces all scattered escalation descriptions. All other sections cross-reference this table.

Tier	Trigger Examples	PRDD Effect	Frozen Assets	Hormuz	Points
Tier 1 (RED)	Nuclear >3.67%; inspector attack; WMD	Snap Line: full suspension	All suspended; UNSC filing	Coalition freeze; SWIFT cut	Auto L4

Tier	Trigger Examples	PRDD Effect	Frozen Assets	Hormuz	Points
Tier 2 (ORANGE)	IRGC cash diversion; major positioning breach; denial of IAEA access	Reduced to 70%; +15% held	Re-suspension lever: 30d delay	Coalition paused; patrols min	3 pts
Tier 3 (YELLOW)	Reporting delay >24h; positioning variance >20%; hotline delay >30min	Unchanged (QC Window)	Unchanged	Unchanged	1 pt
Tier 4 (GREEN)	Strategic flexibility; diplomatic disputes	No effect	No effect	No effect	0 pts
Tier 5 (GRAY)	Force majeure; natural disaster; third-party attack	Protected; continues	Protected; grandfathered	Auto-Hold activates	0 pts

Article 6.3 - Escalation Rules (a) PATTERN THRESHOLD (v2.2 standardized everywhere): 3 occurrences of the same error type within 60 days constitutes a 'pattern' and triggers the next escalation level for that specific issue. (b) DE-ESCALATION: Requires 30 days sustained compliance at current level before dropping one level. (c) HUMANITARIAN FIREWALL: No Tier-1 consequence may affect already-released humanitarian-badged funds, humanitarian corridor operations, medical isotope shipments, or UN agency operations. (d) STANDARD 72-HOUR CYCLE (v2.2): Most non-critical corrections and financial confirmations use a uniform 72-hour window. Exceptions: Snap Line (24h), Dampening (48h), Tier-1 immediate.

Section 7: Enhanced Escrow Mechanics - Iran-Side Technical Annex

Article 7.1 - Banking Network Tier A: Bank Melli Iran (MELIIRTH1) CHF/EUR vostro; Bank Sepah (SEPBIRTH1) at Bank of China CH. Tier B: Mellat, Tejarat, Pasargad (domestic interbank). Tier C: Keshavarzi, Tosee Taavon, EDBI (humanitarian/agricultural/industrial). CNY: Bank of Kunlun Beijing direct. Article 7.2 - SWIFT Protocols MT 103 (>\$10M), MT 202 COV (interbank), MT 199 (compliance attachments), MT 950 (daily statement). Field 72: /ESCROW/TRANCHE/[n]/WEEK/[w]/JIG/[ref]/CERT/[id] All MT 103 via gpi; CBI credited-to-account within 24h. Article 7.3 - Real-Time Access Triple notification: (1) SWIFT MT 103 + gpi, (2) encrypted email to treasury_escrow@cbi.ir within 15 min, (3) SMS via Omani gateway within 30 min. Iranian Dashboard: balances by currency, pending/released tranches, SWIFT UETR, 90-day projections. WEEKEND/HOLIDAY: Releases on preceding business day; domestic transfers next business day with retroactive value dating. Article 7.4 - Sanctions Shielding OFAC General License covers all escrow transfers, correspondent banking, clearing through CHAPS/TARGET2/SIC. U-Turn Exemption: Swiss Escrow (non-US) + CHF/EUR + petroleum already delivered. Wind-Down Protection: If sanctions reimposed, all escrow deposits and pending certified releases are grandfathered. Third-Party Liability Shield: No non-US institution subject to secondary sanctions. Form JIG-SANC-001 issued for every tranche release.

Section 8: What Each Side Concedes and Wins

US CONCEDES: 1. \$750M non-reversible Day-1 cash, no compliance preconditions 2. Accelerated frozen asset release (50% by Day 30) 3. Iran oil exports to 7+ customers at 2.1 mbpd 4. SWIFT reconnection for Melli Iran and Sepah 5. Correspondent banking with Iranian institutions 6. Iranian domestic

sovereignty over fund deployment 7. Political risk of 'paying ransom' accusations 8. Risk Iran pockets money and cheats on nuclear IRAN CONCEDES: 1. Binding enrichment cap at 3.67% effective Day 1 2. IAEA Additional Protocol-level access at Natanz, Fordow, Isfahan 3. IRGC-N small craft withdrawal from corridor 4. 24/7 MCC Hotline with Farsi-English staffing 5. PRDD flows tied to nuclear compliance (Snap Line) 6. 15% oil revenue held as performance reserve 7. Oil customers require IAEA pre-clearance 8. Political risk of 'selling out the revolution' accusations

US WINS: 1. IAEA confirms no enrichment >3.67% for every PRDD release 2. Five-module Hormuz security from Day 7 3. IRGC withdrawal from commercial corridor 4. Nuclear freeze with automatic Snap Line 5. Swiss Escrow retains funds until compliance verified 6. Tranches 4-6 and reserve subject to material-breach review 7. European naval forces under JHA command 8. 24/7 hotline prevents accidental escalation 9. EW Shield reduces explosive incident risk 10. Grace Days, Face-Saving Pause, exit ramp, messaging protection IRAN WINS: 1. \$750M Day 1 (triple original offer) 2. \$250M humanitarian-badged for medical/food 3. Unrestricted oil exports to 7+ customers at 2.1 mbpd 4. \$4.7B/month accessible from Week 3 5. 50% frozen assets by Day 30; 70% by Day 60 6. Full sanctions shield (OFAC General License + JIG Certificate) 7. Currency sovereignty (CHF/EUR/CNY/AED) 8. Exclusive domestic deployment authority 9. 30-day Learning Period; 3 Grace Days per stage 10. Face-Saving Pause, Quiet Correction, exit ramp, pre-approved talking points

Article 8.1 - Performance-Contingent Declaration All benefits are performance-contingent. No benefit is unconditional. Either Party may activate the exit ramp with 14 days notice. Quarterly review every 90 days.

Section 9: Crisis Pause and Graduated Degradation (RCSA v3.6)

Article 9.1 - Crisis Pause Mode Purpose: Structured 30-90 day operational freeze without penalty or reputational cost. Invocation: Written notice to JIG Chair: 'Crisis Pause under Article 9.1. Duration: [30/60/90] days.' No justification required. Effects: Military modules suspended; frozen asset releases paused (scheduled proceed); PRDD at 50%; Oil Export and humanitarian continue; IAEA access continues; hotline and portal continue. Resumption: Automatic at stated duration unless extended by mutual agreement. Either Party may end early with 48h notice. Frequency: Once per 180 days per Party. Non-Humiliation: Reported as 'operational adjustment under Article 9.1' - not compliance failure or collapse. Article 9.2 - Graduated Degradation 4 levels with automatic point-based escalation: LEVEL 1 Advisory (5+ points in 30 days): Weekly JIG review; confidential letter. No financial effect. LEVEL 2 Restricted (9+ points): PRDD to 70%; frozen assets delayed 14d; Coalition paused; patrols to minimum. LEVEL 3 Suspended (15+ points or Tier-1): PRDD to 70%; frozen assets suspended; military modules suspended; SWIFT suspended. LEVEL 4 Critical (Tier-1): Full Snap Line; UNSC filing; full reserve forfeiture. POINTS: Tier-3 = 1 point; Tier-2 = 3 points; Tier-1 = automatic Level 4. ESCALATION: 14 days at each level before further escalation. DE-ESCALATION: 30 days sustained compliance to drop one level. Article 9.3 - Track Maturity Bands Foundation (Days 1-180): Zero-regret measures - nuclear verification, humanitarian corridor, banking restoration, economic liquidity. Stabilization (Days 181-540): Sectoral relief - expanded sanctions relief, additional banking, proxy monitoring, deconfliction, PRDD full normalization. Integration (Days 541+): Regional institutionalization - RDF governance, energy interconnection, reduced monitoring, scientific collaboration. Independent advancement per track. Article 9.4 - Non-Humiliation Doctrine Prohibited: requiring public renunciation of nuclear program; requiring apologies; public inspection photos; media events at verification sites; characterizing compliance as 'submission'; requiring constitutional change. Confidential dispute resolution. Narrative respect. Sovereign equality in all JIG

proceedings.

Section 10: Messaging Framework and Sound-Bites

US SOUND-BITES: 'Every dollar is tied to verified performance. If Iran enriches above 3.67%, the money stops automatically - no debate, no delay.' 'This is not a gift. It is a transaction where Iran gets economic relief and we get nuclear verification.' 'We can walk away in 14 days if Iran cheats. The exit ramp is built in.' 'The humanitarian money goes to medicine and food, not missiles. WHO and WFP verify.' IRAN SOUND-BITES: 'The siege has been lifted because Iran stood firm and negotiated from strength.' 'Our nuclear program continues within NPT rights. The 3.67% cap is our sovereign choice.' 'Every dollar of our oil revenue comes from our own production, sold to customers of our choosing.' 'This is recognition of Iran's rights, not concession. The Snap Line is a technical detail, not a chain.' BOTH SIDES: 'This proves that even the deepest adversaries can find practical cooperation when the alternative is worse.' 'The performance-contingent design means both sides win if both deliver, neither wins if either cheats.'

Article 10.1 - Performance-Contingent Messaging Rule All public characterizations must include acknowledgment that benefits are conditional. Article 10.2 - Regional Allies Observer Status GCC, Iraq, Oman, Pakistan read-only aggregated Transparency Portal access. Article 10.3 - Exit Ramp 14 days written notice to JIG Chair. Humanitarian and oil continue; military suspends. Reversible by mutual agreement. Not precedent.

Section 11: Stability First Implementation Cells and Daily SITREP

Article 11.1 - Implementation Cell Mandate (a) EACH PARTY SHALL establish and maintain a permanent Stability First Implementation Cell of 8-12 staff, responsible for: (i) Reading the Transparency Portal at least once per shift (ii) Preparing and submitting the Daily Stability First SITREP (iii) Managing all forms, permits, and certifications required by this Agreement (iv) Serving as first point of contact for JTAT, JIG, MCC, and Swiss Escrow (v) Maintaining the Learning Curve error log during Days 1-30 (vi) Escalating to senior leadership only when automated triggers require (b) COMPOSITION: - Cell Director (Senior FSO equivalent, direct report to Deputy Secretary/Deputy FM) - Deputy Director (operations) - Financial Officer (escrow, SWIFT, PRDD tracking) - Nuclear Verification Liaison (IAEA coordination) - Hormuz Operations Officer (MCC, naval coordination) - Two Duty Officers (12-hour rotation) - Communications Officer (SITREP, portal, messaging) - Legal/Compliance Officer - Administrative/Support (1-2 staff) (c) REPORTING: Implementation Cell reports to JIG Secretariat weekly. Cell Director attends all JIG working group meetings (in person or virtual). (d) CO-LOCATION: US Cell co-located with State Department Iran Desk. Iranian Cell co-located with CBI Treasury Operations. Both maintain 24/7 coverage during Days 1-30; business hours + on-call thereafter.

Article 11.2 - Daily Stability First Situation Report (SITREP) (a) PURPOSE. One bundled daily report replaces all separate reporting requirements. (b) CONTENTS (one email, one form - JIG-SITREP-001): SECTION A - HORMUZ STATUS (from MCC): Transits completed, incidents, force posture, hotline stats SECTION B - PRDD FLOWS (from Swiss Escrow): Barrels shipped, revenue deposited, percentage

released, reserve status SECTION C - NUCLEAR VERIFICATION (from IAEA): Enrichment level, inspector access, any concerns SECTION D - SAFETY MECHANISMS USED: Grace Days invoked, Face-Saving Pauses, Stabilization Holds, Quiet Correction Windows active SECTION E - LEARNING CURVE LOG: Errors identified, corrections made, pattern review status SECTION F - ESCALATION STATUS: Current degradation level (1-4), points accumulated, days since last event SECTION G - OUTLOOK: Next 24-hour priorities, anticipated issues (c) TIMING. Submitted to JIG Secretariat by 0600 GMT daily. Distributed to both Parties, Pakistani Guarantor, and MCC by 0800 GMT. (d) FORMAT. Standardized template (Appendix C, SOP Template 5). One email with one PDF attachment. No narrative essays; checkbox and data-field format. (e) DUTY OFFICER RULE: If nothing significant occurred in a section, mark 'NIL' and move on. Do not write paragraphs explaining why nothing happened.

Section 12: Minimum Viable Implementation

Article 12.1 - Minimum Viable Implementation Clause (a) PURPOSE. Where non-essential technical detail cannot be implemented on Day 1 due to bureaucratic, technical, or infrastructure constraints, the Parties will use reasonable interim equivalents that preserve the substance for up to 30 days. (b) PERMITTED INTERIM EQUIVALENTS: - Live dashboards -> Manual PDF reports emailed daily - Automated SWIFT Field 72 coding -> Manual email confirmation with required data elements - Real-time gpi tracking -> Daily MT 950/940 statements - Online form submission -> Scanned PDF forms via encrypted email - Multi-currency settlement -> CHF-only for first 14 days - Regional allies portal access -> Daily SITREP distribution via diplomatic cable - Automated Snap Line trigger -> JTAT manual monitoring with 4-hour checkpoint - CNY clearing via Bank of Kunlun -> CHF wire with CNY conversion at CBI (c) CONDITIONS: (i) The interim equivalent must preserve the substance of the obligation (ii) The interim equivalent must not reduce any guardrail or protection (iii) The Party using the interim must notify JIG Secretariat within 24 hours (iv) Full implementation must be achieved within 30 days (v) Extensions require JIG Chair approval (d) PROHIBITED INTERIM EQUIVALENTS: - Manual processes for Tier-1 obligations or Snap Line triggers - Reduced inspector access or delayed enrichment cap - Paper-based hotline (must be voice, real-time) - Unencrypted communications for financial data (e) DEFAULT-if-SILENT APPLIES. If a Party implements an interim equivalent without notifying JIG, and the interim preserves substance, the default-if-silent rule (Article 1.6) treats the implementation as complete.

Section 13: Performance-Linked Economic Cooperation Tracks

This section establishes conditional cooperation tracks that unlock progressively as compliance milestones are sustained. No track becomes available without verified performance. All tracks are subject to the same Snap Line, Tier-1, and Graduated Degradation architecture as the core Agreement.

UNLOCKING PRINCIPLE: All tracks in this section require sustained compliance as a prerequisite. Specific triggers are listed per track. Backsliding activates the same protections as the core Agreement: - Tier-1 or Snap Line activation: all cooperation tracks in this section freeze within 48 hours - Graduated Degradation Level 2+: tracks in the affected band suspend - Crisis Pause: tracks in Subsection A continue; tracks in B and C suspend - Exit Ramp: all tracks suspend except humanitarian-essential elements These tracks are framed as regional stability measures, not bilateral assistance. Each Party may characterize them in terms that serve domestic political requirements,

provided objective benchmarks are met.

13.1 Fast Visible Domestic Wins

Track 1: Stability Infrastructure Window

Article 13.1 - Stability Infrastructure Window (a) PURPOSE. A rapid-disbursing fund for port rehabilitation, power grid stabilization, and hospital upgrades in Iran, with visible attribution and basic procurement transparency. (b) SCALE. Up to \$1.5 billion over 24 months, released in \$250M increments tied to 90-day compliance milestones. (c) UNLOCK CONDITIONS: (i) Stage 1 successfully closed (Day 14) (ii) No Tier-1 or Tier-2 events in preceding 90 days (iii) IAEA certifies enrichment at or below 3.67% (iv) JIG Financial Monitor confirms no IRGC cash diversion (d) ELIGIBLE PROJECTS: Port rehabilitation (Bandar Abbas, Chabahar); power grid stabilization (Tehran, Isfahan, Shiraz grid interconnections); hospital upgrades (equipment and facilities in 12 designated provinces). (e) ATTRIBUTION. Projects carry visible plaque: 'Stability First Infrastructure Cooperation - [Year].' Both Parties may publicly reference projects as evidence of the Agreement's material benefits. (f) PROCUREMENT TRANSPARENCY. Projects subject to open bidding among pre-qualified contractors. JIG Infrastructure Working Group reviews bid awards. Annual audit by independent accounting firm. (g) PERFORMANCE LINKAGE. If a Tier-2 event occurs, next \$250M increment freezes until 90 clean days restored. If Tier-1 or Snap Line activates, all un-disbursed funds freeze immediately; disbursed funds under active contracts continue per humanitarian firewall. (h) US FRAMING. US officials may characterize this as 'regional infrastructure that reduces instability' or 'stabilization investment, not cash assistance.' (i) IRAN FRAMING. Iranian officials may characterize this as 'reconstruction of facilities damaged by sanctions' or 'international recognition of Iran's development needs.'

Track 2: Civilian Aviation and Critical Spare Parts Channel

Article 13.2 - Civilian Aviation and Spare Parts Channel (a) PURPOSE. A clearly defined licensing channel for civilian aircraft spare parts and critical industrial spare parts (refineries, power plants), activated when nuclear and Hormuz benchmarks are met. (b) UNLOCK CONDITIONS: (i) 60 days of sustained compliance (Day 60 milestone reached) (ii) IAEA certifies no diversion to military programs (iii) Hormuz incident rate below threshold (Appendix A, Day 60 checkpoint) (c) ELIGIBLE ITEMS: Civilian aircraft engines and components (Boeing, Airbus, ATR compatible); refinery maintenance parts; power plant turbine components; medical device manufacturing equipment. (d) LICENSING. OFAC issues commodity-specific General Licenses within 14 days of unlock. Licenses valid for 180 days, renewable upon JIG confirmation of continued compliance. (e) PERFORMANCE LINKAGE. Licenses suspended if Tier-1 or Snap Line activates. 30-day review if Tier-2 event occurs. (f) US FRAMING. 'Safety-focused modernization of civilian aviation and energy infrastructure.' (g) IRAN FRAMING. 'Restoration of Iran's right to maintain civilian aircraft and industrial facilities.'

Track 3: Grid Stability and Climate Resilience Cooperation

Article 13.3 - Grid and Climate Resilience Track (a) PURPOSE. Dedicated cooperation on power grid stability, renewable energy integration, and water-efficiency technology - areas that address practical domestic needs while aligning with international climate objectives. (b) UNLOCK CONDITIONS: (i) 90 days sustained compliance (Day 90) (ii) No material breach in preceding 90 days (iii) JIG Scientific Working Group confirms civilian-use verification (c) ELIGIBLE COOPERATION: Smart grid technology transfer; solar and wind integration consulting; water-efficiency irrigation systems;

drought monitoring technology. (d) MECHANISM. Joint Technical Working Group under JIG meets quarterly. Technology transfer via licensed commercial vendors. No direct government-to-government cash transfers. (e) PERFORMANCE LINKAGE. Working Group suspends if Graduated Degradation reaches Level 3. Dissolves if Level 4 reached. (f) US FRAMING. 'Climate and resilience cooperation that reduces regional fragility.' (g) IRAN FRAMING. 'International cooperation on sustainable development and water security.'

Track 4: Tourism and Academic Corridor Pilot

Article 13.4 - Tourism and Academic Corridor (a) PURPOSE. A pilot program easing visa and flight arrangements for limited categories of travelers after sustained Stage 1 stability. (b) UNLOCK CONDITIONS: (i) Stage 1 held for 180 days (6 months) (ii) No Tier-1 or Tier-2 events in preceding 180 days (iii) Both Parties confirm terrorist threat assessment acceptable (c) ELIGIBLE CATEGORIES: Graduate students (verified enrollment); scientific exchange researchers (JIG-approved institutions); religious pilgrims (registered tour operators); medical tourism (pre-approved facilities). (d) MECHANISM. Dedicated visa processing track at designated embassies. Charter flights via approved carriers (initially 2 per week). JIG Travel Security Unit monitors all routes. (e) PERFORMANCE LINKAGE. Corridor suspends if any security incident involving corridor travelers. Full review if Tier-2 event occurs. (f) US FRAMING. 'People-to-people engagement that builds transparency and reduces misunderstanding.' (g) IRAN FRAMING. 'Cultural and scientific exchange demonstrating Iran's openness and civilizational connectivity.'

Track 5: Hormuz Stability Insurance Mechanism

Article 13.5 - Hormuz Stability Insurance Mechanism (a) PURPOSE. An explicit link between incident rates in Hormuz and shipping insurance premiums, creating a direct economic incentive for sustained compliance. (b) UNLOCK CONDITIONS: (i) Stage 1 closed successfully (ii) Lloyd's List confirms 90 consecutive days with zero Hormuz incidents (iii) JIG certifies all five Hormuz modules operational (c) MECHANISM. If incident rates in Hormuz remain below 2 per quarter, Lloyd's of London and participating insurers apply a premium discount of 8-12% on Gulf shipping routes. JIG Marine Insurance Working Group verifies data quarterly. (d) PERFORMANCE LINKAGE. Premium discount reduces by 50% if one incident occurs; suspends if two incidents in a quarter. Discount fully restores after 90 clean days. (e) US FRAMING. 'Our agreement reduced insurance costs for every ship in the Gulf - a tangible benefit to global commerce.' (f) IRAN FRAMING. 'Iran's commitment to Hormuz security has made shipping safer and cheaper for all nations.'

13.2 Regional Economic Integration Tracks

Track 6: Conditional Energy Market Coordination

Article 13.6 - Energy Market Coordination (a) PURPOSE. Structured consultations on global energy market stability to avoid supply shock spikes, activated once Iran is exporting stably under PRDD. (b) UNLOCK CONDITIONS: (i) PRDD operational for 120 days with no Snap Line activation (ii) Iran exporting at or above 1.5 mbpd sustained (iii) IAEA certifies no enrichment above 3.67% (c) MECHANISM. Quarterly Energy Working Group under JIG. Information sharing on production schedules, spare capacity, and market outlook. No production quotas or binding commitments. (d) PERFORMANCE LINKAGE. Working Group suspends if Snap Line activates. Membership reviewed if Graduated Degradation reaches Level 2. (e) US FRAMING. 'Energy security consultations that reduce gasoline price risk for American consumers.' (f) IRAN FRAMING. 'Iran's return to responsible energy market stakeholder status.'

Track 7: Western Commercial Participation Window

Article 13.7 - Western Commercial Participation (a) PURPOSE. A defined list of sectors where Western and regional firms may legally bid on projects, creating export and jobs benefits for US/EU partners. (b) UNLOCK CONDITIONS: (i) 180 days sustained compliance (ii) JIG Commercial Working Group confirms procurement transparency (iii) Both Parties confirm no dual-use technology risk (c) ELIGIBLE SECTORS: Port logistics and management; renewable energy installation; medical device manufacturing; IT infrastructure and data centers; hospitality and tourism services; agricultural processing. (d) MECHANISM. JIG publishes pre-qualified project list annually. Open competitive bidding. OFAC General License for US firm participation. EU parallel authorization. (e) PERFORMANCE LINKAGE. License suspends for new projects if Tier-2 event occurs. Existing contracts continue per humanitarian firewall. (f) US FRAMING. 'American firms winning contracts and creating jobs in a stabilizing region.' (g) IRAN FRAMING. 'International investment flowing into Iran's productive economy.'

Track 8: Regional Logistics Hub Roadmap

Article 13.8 - Regional Logistics Hub Roadmap (a) PURPOSE. A roadmap toward Iran's formal recognition as a logistics, rail, and energy transit hub connecting the Gulf, Central Asia, and Europe, contingent on sustained stability. (b) UNLOCK CONDITIONS: (i) 365 days sustained compliance (Sovereignty Milestone 5) (ii) All Hormuz modules operational without degradation (iii) Regional allies (Oman, Pakistan, Turkey, Iraq) confirm support (c) MECHANISM. JIG Logistics Working Group produces feasibility studies. Regional Development Fund provides up to \$500M in infrastructure lending. International Rail Corridor agreement negotiated under JIG auspices. (d) PERFORMANCE LINKAGE. Roadmap pauses if Graduated Degradation reaches Level 2. Terminates if Level 4 reached. (e) US FRAMING. 'Regional connectivity that reduces dependence on single chokepoints and spreads prosperity.' (f) IRAN FRAMING. 'Iran's historic role as a crossroads of commerce restored through stability and cooperation.'

Track 9: Sovereign Debt-Service Facilitation

Article 13.9 - Sovereign Debt-Service Facilitation (a) PURPOSE. Escrow-channeled, sanctions-shielded payments for Iran's sovereign and quasi-sovereign debts to US/EU-aligned creditors, activated once compliance is demonstrated. (b) UNLOCK CONDITIONS: (i) 180 days sustained compliance (ii) IMF confirms Iran's debt sustainability assessment (iii) JIG Financial Monitor confirms no diversion risk (c) MECHANISM. Debt payments channeled through Petroleum Revenue Escrow. OFAC General License for creditor banks. Payments only to pre-registered, non-designated creditors. (d) PERFORMANCE LINKAGE. Payment channel suspends if Snap Line activates. 30-day review if Tier-2 event. (e) US FRAMING. 'Stabilizing the international financial system and protecting Western creditors.' (f) IRAN FRAMING. 'Iran meeting its financial obligations through restored economic access.'

Track 10: Multilateral Development Priority

Article 13.10 - Multilateral Development Priority (a) PURPOSE. Encouraging international financial institutions to prioritize eligible Iranian projects in non-sensitive sectors once IAEA certifies sustained compliance. (b) UNLOCK CONDITIONS: (i) 365 days sustained compliance (ii) IAEA certifies 12 consecutive months at or below 3.67% (iii) World Bank/IMF confirm Iran's compliance with reporting requirements (c) ELIGIBLE INSTITUTIONS: World Bank (IBRD/IDA), Asian Development Bank, AIIB, EBRD, Green Climate Fund. (d) ELIGIBLE PROJECTS: Water sanitation, renewable energy, public health, agricultural modernization, disaster preparedness. (e) MECHANISM. JIG prepares

project pipeline for endorsement. Institutions make independent lending decisions. No mandatory lending quotas. (f) PERFORMANCE LINKAGE. Pipeline suspends if Snap Line activates. Reviewed if Graduated Degradation reaches Level 3. (g) US FRAMING. 'Bringing Iran back into responsible international financial venues.' (h) IRAN FRAMING. 'International recognition of Iran's development priorities and creditworthiness.'

13.3 Industrial and Trade Expansion Tracks

Track 11: Industrial Recovery Tranches

Article 13.11 - Industrial Recovery Tranches (a) PURPOSE. Earmarked frozen asset releases for specific industrial recovery projects, allowing Iranian leaders to point to concrete factories and jobs tied to compliance. (b) UNLOCK CONDITIONS: (ii) Tranche 4 released (Day 120) (iii) JIG Industrial Working Group confirms project list (iv) No Tier-2 events in preceding 90 days (c) ELIGIBLE SECTORS: Steel production (Esfahan Steel, Mobarakeh); petrochemical expansion (Asaluyeh complex); automotive (IKCO, SAIPA modernization). (d) MECHANISM. \$500M earmarked from Tranche 4 and Reserve, released in \$100M increments tied to 90-day compliance periods. JIG verifies procurement transparency. (e) PERFORMANCE LINKAGE. Increment freezes if Tier-2 event. Full freeze if Tier-1 or Snap Line. (f) IRAN FRAMING. 'This agreement brought production back to [specific plant] and jobs to [specific region].' (g) US FRAMING. 'Productive investment in civilian industry, not military programs.'

Track 12: Joint Inflation and Currency Stabilization Communication

Article 13.12 - Joint Economic Stability Communication (a) PURPOSE. A structured communication mechanism for both Parties to acknowledge expected macroeconomic stabilization effects as oil and asset flows reach defined levels. (b) UNLOCK CONDITIONS: (i) PRDD cumulative flows exceed \$5 billion (ii) 50% of frozen assets released (iii) Both central banks confirm data availability (c) MECHANISM. Joint JIG Economic Assessment every 90 days, published to Transparency Portal. Reports inflation trends, currency stability indicators, and trade flow data. (d) PERFORMANCE LINKAGE. Assessment suspends if Graduated Degradation reaches Level 2. Retrospective data still published. (e) IRAN FRAMING. 'This agreement stabilized the rial and reduced inflation - verifiable data from the Joint Implementation Group.' (f) US FRAMING. 'Economic transparency that demonstrates the tangible benefits of verified compliance.'

Track 13: Regional Trade Preference Corridor

Article 13.13 - Regional Trade Preference Corridor (a) PURPOSE. After sustained compliance, regional partners grant Iran limited tariff or quota preferences in specific goods through a designated customs corridor. (b) UNLOCK CONDITIONS: (i) 270 days sustained compliance (9 months) (ii) Regional partners (Oman, Turkey, Iraq, Pakistan) confirm readiness (iii) JIG Customs Working Group verifies border infrastructure (c) MECHANISM. 'Stability First Customs Corridor' designation at designated border crossings. Reduced inspection rates (from 100% to 20% sampling). Preferential tariff rates (10-15% reduction) on agricultural products, textiles, and construction materials. (d) PERFORMANCE LINKAGE. Preferences suspend if Tier-2 event. Full suspension if Tier-1 or Snap Line. (e) IRAN FRAMING. 'Regional neighbors recognizing Iran as a reliable trading partner.' (f) US FRAMING. 'Regional economic integration that reduces conflict incentives and builds interdependence.'

Track 14: Joint Investment Facilitation Team

Article 13.14 - Joint Investment Facilitation (a) PURPOSE. A small JIG team to help match foreign direct investment into pre-cleared sectors, creating a pipeline of visible investment projects. (b) UNLOCK CONDITIONS: (i) 180 days sustained compliance (ii) JIG Commercial Working Group confirms sectoral pre-clearance (iii) Both Parties confirm no sanctions circumvention risk (c) PRE-CLEARED SECTORS: Agribusiness and food processing; logistics and cold chain; hospitality and conference facilities; IT services and business process outsourcing; pharmaceutical manufacturing. (d) MECHANISM. Investment Facilitation Team (4 staff: 2 from each Party) maintains project pipeline database. Quarterly investor roadshows in Dubai, Istanbul, and Geneva. No investment guarantees; only facilitation and due diligence support. (e) PERFORMANCE LINKAGE. Team suspends if Graduated Degradation reaches Level 3. Dissolves if Level 4. (f) IRAN FRAMING. 'International investors returning to Iran's productive economy.' (g) US FRAMING. 'Commercial matchmaking that creates opportunities without government subsidies.'

Track 15: Independent Economic Assessment

Article 13.15 - Independent Economic Assessment (a) PURPOSE. A public, independent economic assessment after 2-3 years measuring growth, employment, trade, and humanitarian indicators attributable to Stability First, providing a legacy framework for both Parties. (b) UNLOCK CONDITIONS: (i) 24 months sustained compliance (ii) Both Parties request assessment (iii) JIG confirms data availability (c) METHODOLOGY. Independent academic consortium (one US institution, one Iranian institution, one neutral third-country institution) conducts assessment using Transparency Portal data, central bank statistics, and IAEA compliance records. (d) SCOPE: GDP growth attribution; employment in eligible sectors; trade volume changes; humanitarian indicator improvements (medical imports, food security); Hormuz shipping cost trends; insurance premium trends. (e) PUBLICATION. Full report published to Transparency Portal. Executive summary in English, Farsi, and Arabic. Both Parties may cite findings in domestic messaging. (f) PERFORMANCE LINKAGE. Assessment proceeds regardless of later compliance status (retrospective analysis). However, if either Party is in Level 3+ degradation at publication date, report includes prominent disclaimer. (g) IRAN FRAMING. 'The historic stabilization brought measurable prosperity to the Iranian people - verified by independent international experts.' (h) US FRAMING. 'Verifiable evidence that pressure-plus-diplomacy produced better outcomes than either sanctions alone or military confrontation.'

Appendix A: Day-1 to Day-14 Control Panel

This is the single operational table that duty officers work from. One row per day. Four columns: what Iran must do, what the US must do, what guarantors must do, and what happens automatically if anything is late.

COLOR KEY: RED (Tier-1 / Zero Tolerance): Nuclear, inspector safety, WMD - immediate consequence, no pauses allowed ORANGE (Tier-2 / Minimal Tolerance): Significant breach - re-suspension lever, reduced PRDD YELLOW (Tier-3 / Learning-Period): Minor issue - 72-hour Quiet Correction Window, JTAT handles GREEN: Automatic protective mechanism activates without penalty

Day	Iran Must Do	US Must Do	Guarantors Must Do	If Late: Auto-Consequence
-14	Confirm correspondent account readiness	Confirm wire instructions drafted	Swiss Escrow: open nostro accounts	Delay >T-7: Backup channel activation

Day	Iran Must Do	US Must Do	Guarantors Must Do	If Late: Auto-Consequence
-7	CBI dashboard access tested; JTAT hosted	Confirm OFAC license ready for signature	JTAT deploys Tehran /Geneva	Delay: Learning Period extension to Day 37
-1	MCC Hotline staffing roster submitted	Treasury wires prepared; OFAC license issued conditional	MCC: confirm 24/7 watch rotation	Delay: Stage opening slips by 48h max
1	[RED] Enrichment cap order to AEOI; IAEA notified [RED] IRGC withdrawal begins [YELLOW] Hotline staffed	[RED] \$750M wired to Swiss Escrow [RED] OFAC General License effective [YELLOW] JHA permits issued	[GREEN] JIG posts Pairing confirmations [GREEN] MCC confirms hotline live	Pairing fail: ALL Pairings suspend >24h: Grace Day auto-offered >48h: Dampening Window
2	[YELLOW] IAEA inspectors cross at Dogharoon [GREEN] First oil cargo loads	[GREEN] European Coalition integration opens [GREEN] Lloyd's coverage reinstated	[GREEN] JIG confirms inspector border crossing [GREEN] MCC confirms first cargo AIS	Inspector delay: QC Window 72h Cargo delay: JTAT assists loading
3	[YELLOW] Humanitarian corridor opens [YELLOW] IRGC Day-3 checkpoint	[GREEN] Transparency Portal data feed verified	[GREEN] UN OCHA confirms corridor [GREEN] Pakistani Guarantor first check-in	Corridor delay: QC Window Checkpoint fail: Tier-2 advisory
4	[YELLOW] MHS-005 joint patrol rehearsal	[GREEN] EW systems tested (MHS-012)	[GREEN] MCC: patrol coordination [GREEN] JIG: compliance review	Rehearsal delay: Learning Period protected EW fail: JTAT technical assist
5	[YELLOW] Blockade lift confirmation call (MHS-011)	[GREEN] Hotline full staffing confirmation	[GREEN] MCC: readiness assessment [GREEN] JHA observation vessels deploy	Call delay: QC Window Staffing gap: 24h to fill
6	[YELLOW] 1200 GMT: Final confirmation [YELLOW] 2330 GMT: Readiness GREEN	[GREEN] Confirm readiness status	[GREEN] MCC: compile readiness report [GREEN] JIG: distribute to all Parties	Missed confirmation: Stabilization Hold offered (auto if both agree)
7	[RED] 0000 GMT: Synchronized Lift [GREEN] IRGC at 2nm distance	[RED] 0000 GMT: Synchronized Lift [GREEN] Coalition patrol on station	[GREEN] JHA observation on station [GREEN] First PRDD weekly cycle begins	Lift fail: Tier-2 immediate Distance fail: Dampening + QC Window
8	[GREEN] First commercial transit through corridor [GREEN] Oil delivery confirmation	[GREEN] Transit verification via Lloyd's	[GREEN] MCC: daily transit log initiated [GREEN] Swiss Escrow: revenue confirmation	Transit delay: JTAT assist Revenue delay: 72h financial cycle
9	[YELLOW] Force Posture Verification (MHS-016) [YELLOW] 60% P1/P2 soft cap check	[GREEN] EW shield check (MHS-012) [GREEN] Portal review	[GREEN] JIG: posture assessment [GREEN] JTAT: P1/P2 compliance consult	Posture gap: QC Window P1/P2 gap: JTAT consult (not compliance)
10	[ORANGE] 96-Hour Checkpoint: lift certification [YELLOW] \$750M receipt confirmed by CBI	[ORANGE] Confirm lift certification [GREEN] CBI confirms funds received	[GREEN] Pakistani Guarantor: Stage 1 interim report [GREEN] JIG: checkpoint assessment	Certification fail: Tier-2 advisory Funds delay: 72h financial cycle
11	[YELLOW] Hotline performance review (MHS-013) [GREEN] First PRDD weekly release	[GREEN] PRDD certification via JIG Financial Monitor	[GREEN] MCC: hotline stats compiled [GREEN] Swiss Escrow: release executed	Hotline gap: QC Window PRDD delay: 72h cycle
12	[YELLOW] Force posture compliance check [YELLOW] EW incident review	[GREEN] Patrol assessment [GREEN] Snap Line drill #1 scheduled	[GREEN] JIG: 12-day readiness review [GREEN] JTAT: error pattern analysis	Compliance gap: QC Window Drill: scheduled, not scored
13	[YELLOW] Stage 1 readiness review [YELLOW] All forms compiled	[GREEN] Pre-closing certification [GREEN] Implementation Cell week-2 report	[GREEN] JIG: pre-closing assessment [GREEN] Pakistani Guarantor: progress summary	Form gaps: Default-if-Silent applies Review delay: 24h extension offered
14	[RED] STAGE ONE CLOSING [GREEN] 200+ transits target [GREEN] Sovereignty Milestone 1 declared	[RED] Confirm Stage 1 closure [GREEN] Tranche 1 authorization	[GREEN] JIG: closure certification [GREEN] Swiss Escrow: Tranche 1 release	Closure fail: Tier-2 advisory Tranche delay: 72h financial cycle

Appendix B: EYES ONLY Contact Directory

Operational contact details for authorized negotiators only.

Institution	Role / Time Zone	Operational Contact Details
Pakistani Guarantor	Primary Mediator / JIG Chair (PKT +5)	PM Office: +92-51-920-6111. Mobile: +92-300-855-9247. JIG Hotline Geneva: +41-22-917-4321
Omani Technical Channel	Hotline Host (GST +4)	MFA Muscat: +968-24-698-000. MCC 24/7: +968-24-711-900. Tier 3: +968-24-698-111

Appendix C: SOP Templates

SOP 1: Grace Day Invocation

Send encrypted message to JIG Chair and Pakistani Guarantor: 'Grace Day invoked under Article 1.2. Effective [date]. Reason: [DOM-LEG/PER-TRANS/TECH-PREP]. Resumption: [date+24h].'

JIG Chair acknowledges within 2 hours. Obligations deferred. No compliance record. Counter decremented.

SOP 2: Face-Saving Pause Invocation

Send written notification to JIG Chair: 'Face-Saving Pause under Article 1.3. Action under review:

[specific].'

JIG Chair acknowledges within 4 hours. Action deferred 7 days. Auto-proceeds unless both Parties modify.

SOP 3: Crisis Pause Mode Invocation

Notification to JIG Chair: 'Crisis Pause under Article 9.1. Duration: [30/60/90] days.'

JIG Chair acknowledges within 4 hours. Military modules suspend; economic/humanitarian continue. Auto-resumption at stated duration.

SOP 4: Quiet Correction Window

Automatic upon JTAT identification. Hour 0-24: Party may correct without record. Hour 24-48: JTAT assists if correction in progress. Hour 48-72: If corrected, formally resolved with no compliance mark. Hour 72+: Escalates to formal compliance track.

SOP 5: Daily SITREP Preparation

Template: JIG-SITREP-001. Sections A-G. Checkbox and data-field format. Submit by 0600 GMT. Mark 'NIL' for sections with no activity.

Appendix D: Invocation Forms

Form INV-001: Grace Day Invocation

Field	Format/Entry	Notes
Invoking Party	[US / Iran]	
Invoking Official	[Name/Title]	Deputy Secretary+
Date/Time	[DD/MM/YYYY HH:MM GMT]	
Effective Date	[DD/MM/YYYY]	Within 48h
Reason	[DOM-LEG/PER-TRANS/TECH-PREP]	
Resumption	[DD/MM/YYYY HH:MM GMT]	Date+24h
Grace Days Remaining	[3/2/1/0]	
4-per-30 Counter	[1/2/3/4]	Combined
JIG Chair Ack	[Name/Timestamp]	Within 2h

Form INV-002: Face-Saving Pause Invocation

Field	Format/Entry	Notes
Invoking Party	[US / Iran]	
Invoking Official	[Name/Title]	Foreign Minister+
Date/Time	[DD/MM/YYYY HH:MM GMT]	
Action Under Review	[Specific obligation]	
Pause Expiration	[DD/MM/YYYY HH:MM GMT]	+7 days
Pauses Used	[1/2]	Max 2 per 30 days

Field	Format/Entry	Notes
4-per-30 Counter	[1/2/3/4]	
JIG Chair Ack	[Name/Timestamp]	Within 4h

Form INV-003: Crisis Pause Mode (RCSA)

Field	Format/Entry	Notes
Invoking Party	[US / Iran]	
Invoking Official	[Name/Title]	Head of Gov or designee
Date/Time	[DD/MM/YYYY HH:MM GMT]	
Duration	[30/60/90] days	
180-Day Counter	[First/Already used]	Once per 180d per Party
Military	[SUSPENDED]	All MHS
Economic	[CONTINUE at 50%]	PRDD at 50%
Humanitarian	[CONTINUE]	MHS-023
JIG Chair Ack	[Name/Timestamp]	Within 4h

Form INV-004: Exit Ramp Activation

Field	Format/Entry	Notes
Invoking Party	[US / Iran]	
Invoking Official	[Name/Title]	Head of Gov or designee
Date/Time	[DD/MM/YYYY HH:MM GMT]	
Notice Period	14 days	Fixed
Effective Date	[DD/MM/YYYY]	Notice + 14 days
Military Modules	[SUSPEND]	
Oil Track	[CONTINUE 30d wind-down]	
Humanitarian	[CONTINUE unchanged]	
PRDD	[50% for 30d, then suspend]	
Reversible	[Yes, by mutual agreement]	
JIG Chair Ack	[Name/Timestamp]	Within 4h

Form SNAP-001: PRDD Snap Line Activation Log

Field	Format/Entry	Notes
Trigger Date/Time	[DD/MM/YYYY HH:MM GMT]	
IAEA Ref	[IAEA-XX-YYYY-ZZ]	
Enrichment Level	[X.XX% U-235]	>3.67%
Facility	[Natanz/Fordow/Isfahan/Arak/ Undeclared]	
Escrow Suspension	[HH:MM GMT]	Within 4h
CBI Notify	[HH:MM GMT]	Within 6h

Field	Format/Entry	Notes
JIG Emergency	[Convened/Pending]	
PRDD Status	[SUSPENDED/50%/75%/Full]	
Resolution	[IAEA access/Enrichment reduction/Both]	

Form SITREP-001: Daily Stability First SITREP

Field	Format/Entry	Notes
Reporting Date	[DD/MM/YYYY]	
Submitting Cell	[US/Iran]	
Section A Hormuz	[NIL or data]	MCC source
Section B PRDD	[NIL or data]	Swiss Escrow
Section C Nuclear	[NIL or data]	IAEA source
Section D Safety Valves	[List used]	
Section E Learning	[Errors/corrections]	
Section F Escalation	[Level/Points/Days]	
Section G Outlook	[Next 24h priorities]	
Submitted By	[Name/Title]	
Timestamp	[DD/MM/YYYY HH:MM GMT]	By 0600 GMT

Appendix E: Mechanism Flowcharts

One-page visual decision paths for the three most critical mechanisms. These do not replace the operative text; they supplement it for duty officers.

Flowchart 1: PRDD Weekly Release

START: Monday 0000 GMT | STEP 1: Lloyd's List confirms cargo delivery? YES -> Proceed to Step 2
 NO -> Hold until confirmed (max 72h) | STEP 2: JIG Financial Monitor certifies no material breach in preceding 7 days? YES -> Proceed to Step 3 NO -> Check Degradation Level (Section 6.3 table)
 Level 1 (Advisory) -> 85% release Level 2+ (Restricted+) -> 70% release | STEP 3: Check Snap Line status ACTIVE -> Full suspension; go to Snap Line Flowchart INACTIVE -> Proceed to Step 4 | STEP 4: Calculate release amount Baseline (no Tier-2+ in 30 days): 85% of weekly revenue Reduced (Tier-2 or Tier-3 in 30 days): 70% Reserve: 15% held, released at 30-day checkpoint | STEP 5: Swiss Escrow releases to CBI within 72 hours CBI confirms via MT 199 gpi confirmation posted to Portal JIG verifies by Hour 48 Pakistani Guarantor certificate by Hour 72 | END: Funds available to Iran

Flowchart 2: PRDD Nuclear Snap Line

TRIGGER: IAEA confirms enrichment >3.67% | HOUR 0: IAEA posts confirmation to Transparency Portal (Auto-generated, no human approval required) | HOUR 2: Swiss Escrow receives automated suspension instruction All pending PRDD releases FROZEN New PRDD deposits SUSPENDED (Oil

Export Normalization Track CONTINUES) | HOUR 4: CBI notified via encrypted channel | HOUR 6: JIG Chair emergency session convened IAEA DG presents evidence Both Parties may respond No vote required - Snap Line is automatic | HOUR 24: If trigger UNRESOLVED -> Full suspension confirmed If trigger RESOLVED -> Partial resumption: Iran provides access -> 50% resumes Enrichment returned to 3.67% -> 75% resumes 30 days clean -> 100% resumes | RESUMPTION: Only IAEA DG can certify resolution No political authority may override Quarterly drill tests infrastructure (no actual flow impact)

Flowchart 3: Safety Mechanism Selection

SITUATION IDENTIFIED | Is it a Tier-1 event (nuclear, inspector safety, WMD)? YES -> Immediate Tier-1 response (no pauses allowed) NO -> Is enrichment >3.67% detected? | Is enrichment >3.67%? YES -> Snap Line activates automatically (no human decision) NO -> Is there a military safety incident? | Is there military safety incident? YES -> Dampening Window (48h automatic military freeze) NO -> Is it politically sensitive timing issue? | Politically sensitive? YES -> Face-Saving Pause (7 days, FM+, max 2 per 30d) NO -> Is it operational timing issue? | Operational timing issue? YES -> Grace Day (24h deferral, 3 per Stage) NO -> Is it multiple related obligations? | Multiple obligations? YES -> Stabilization Hold (7 days, 2 per 30d, up to 3 obligations) NO -> Is it minor procedural gap? | Minor procedural gap? YES -> Default-if-Silent: treat as complete, log for Quiet Correction NO -> Call JIG Chair for guidance

Appendix F: Consolidated Forms and Codes Register

All forms, codes, permits, and certifications used in this Agreement in one place. Cross-reference this appendix from other sections instead of repeating field-level detail.

Form/Code	Purpose	Who Fills	Deadline	Submit To
INV-001	Grace Day Invocation	Deputy Secretary/Deputy FM+	6h before effective	JIG Chair + Pakistani G.
INV-002	Face-Saving Pause Invocation	Foreign Minister+	24h before effective	JIG Chair
INV-003	Crisis Pause Mode (RCSA)	Head of Gov or designee	Immediate	JIG Chair
INV-004	Exit Ramp Activation	Head of Gov or designee	14 days before effective	JIG Chair
SNAP-001	PRDD Snap Line Activation Log	JIG Financial Monitor (auto)	Real-time	JIG Chair + Both Parties
SITREP-001	Daily Stability First SITREP	Implementation Cell	0600 GMT daily	JIG Secretariat
JHA-TRANS-001	Hormuz Transit Permit	MCC Muscat	Before cargo loads	Vessel master + Lloyd's
JIG-SANC-001	Sanctions Shield Certificate	JIG Financial Monitor	Per tranche release	CBI + Swiss Escrow

Form/Code	Purpose	Who Fills	Deadline	Submit To
IAEA-PC-001	Customer Pre-clearance Certificate	IAEA Secretariat	Every 90 days	JIG + Whitelist
ESC-CONF-001	Escrow Release Confirmation	Swiss Escrow Agent	72h after delivery	CBI + JIG
MT 103	Wire Transfer (>\$10M)	Swiss Escrow Agent	Per tranche schedule	CBI vostro account
MT 202 COV	Interbank Settlement	Correspondent bank	Per tranche schedule	Swiss Escrow
MT 199	Compliance Acknowledgment	CBI Treasury	24h after credit	Swiss Escrow + JIG
MT 950	Daily Statement	Swiss Escrow Agent	Daily	CBI Treasury
Field 72	Escrow Coding	Swiss Escrow Agent	Per MT 103	SWIFT network
gpi Confirm	End-to-end Tracking	SWIFT network (auto)	Real-time	Transparency Portal
P1-P4 Codes	Iranian Priority Codes	CBI Treasury	Per deployment	SEPAM/PAYA system

Appendix G: Sovereignty Restoration Trajectory (RCSA v3.6)

MILESTONE 1 - FOUNDATION (Day 1): Institutional Voice Equal JIG seat, Iranian nationals eligible for JMOC positions, state media accredited to Portal. MILESTONE 2 - STABILIZATION (Day 30): Direct Revenue Access Petrochemical export revenue flows directly to CBI via PRDD. 50% frozen assets released. MILESTONE 3 - STABILIZATION (Day 60): Banking Autonomy Iranian banks operate with restored correspondent relationships. 70% frozen assets released. MILESTONE 4 - INTEGRATION (Day 180): Reduced Monitoring IAEA inspection frequency reduced proportionally to sustained compliance. MILESTONE 5 - INTEGRATION (Day 365): Fiscal Independence Asset micro-tranches released directly to CBI. Full sovereign budget authority. MILESTONE 6 - INTEGRATION (Day 540): Scientific Collaboration Fordow IMIRC under International Advisory Board with Iranian co-chair. MILESTONE 7 - INSTITUTIONALIZATION (Day 720+): Full Economic Sovereignty Zero revenue escrow. Full SWIFT. Standard IAEA safeguards. Iran chairs JIG on rotation.
