1. Framework at a Glance

Core Doctrine

"This isn't phased diplomacy; it's calibrated cooperation that adapts in real time."

RAMES operates through four continuous tracks that auto-advance based on verified CIS performance. No ceremony, no unanimous vote to advance. Progress compounds while preserving exit options at every stage.

Element	What It Means for Negotiators
4 Continuous Tracks	Nuclear (wt.3), Security/Proxy (wt.2), Economic (wt.2), Humanitarian (wt.1). Each deepens independently based on CIS sub-scores. Track independence is a design feature, not a bug.
CIS Score	Compliance Indicator Score: 0 = full compliance; 7+ = regression triggers; 12+ = snapback; 15+ = emergency. Weighted composite across all four tracks.
Auto-Advance	Tracks deepen automatically when CIS sub-score stays at or below 4 points over rolling 90-day window. No political vote required. IVC validation confirms.
Regression Ladder	4-rung automatic reversibility: Advisory (7–8), Suspension (8–10), Rollback (10–12), Snapback (≥12). Each rung has predefined automatic consequences.
Soft Start	90-day observation period after signature. Monitoring active; penalties suspended. Parties calibrate before full scoring. Entry Protocol (Document 0) is the 5-page public-facing door-opener.
Manual Overrides	1 deferral + 2 cooling-offs + 4 score reviews per year per party. Strictly limited, transparent, non-cumulative.
Failure Without Collapse	One track failing does not collapse the others. Humanitarian and Economic tracks can survive independent of Nuclear track failure. Selective Pause mechanism.
Cross-Track Coupling	No track may advance to DEEPENING-2 unless all other tracks are at Regression Rung 1 or better. Prevents cherry-picking. Humanitarian Track partially exempt.
Quiet Correction Default	Informal resolution is the norm; public designation is the exception. 48-hour confidential consultation before any public Pattern of Concern designation.
40 Optional Modules	Organized in 4 waves (Resilience, Dignity, Structural, Accessibility). All optional; all activate by Joint Commission consensus only. Plug-and-play.

2. The Four Continuous Tracks

Track	Weight	Baseline (Days 1–90)	DEEPENING-1 (Day 91+)	DEEPENING-2 (Day 181+)
1. Nuclear	3 / 8	Cap at 3.67%; IAEA continuous monitoring; 60%-enriched uranium disposition begins	Additional Protocol provisional; Fordow conversion milestone 1; civilian nuclear cooperation framework activated	Full Additional Protocol ratification pathway; Fordow repurposing operational; Section 123 Agreement in force
2. Security / Proxy	2 / 8	Affiliated armed group freeze declaration; maritime deconfliction corridor active; no new offensive operations	De-escalation annexes (BB–FF) activated; JMCC operational; Joint Commission security sub-committee convened	IHTA (Annex GG) fully operational; Tripartite Monitoring Mechanism (TMM) embedded; regional security opt-in protocol opens
3. Economic	2 / 8	\$7B frozen assets released tranche 1; humanitarian conditional cooperation benefits in force	Oil and trade normalization tranche 1; banking channel expansion; IMESI onboarding framework activates	Full IMESI integration; trade corridor harmonization; energy grid cooperation agreement enters operative phase
4. Humanitarian	1 / 8	Gaza corridors active (320+ tons/day target); Lebanon emergency fuel/healthcare operational; UN access guaranteed	Syrian voluntary return pathways operational; Lebanon reconstruction fund seeded; humanitarian monitoring expanded	Full reconstruction framework (IMESI-linked); long-term refugee resettlement architecture; civilian infrastructure rebuilding program

Track Independence & Coupling Rules

Scenario	DEEPENING-1	DEEPENING-2
All Tracks ≤ 4 pts	All advance	All advance
Track 2 at 6 pts; others ≤ 4	T2 held; T1/T3/T4 advance	Blocked until T2 returns to ≤ 8
Track 2 at 9 pts (Rung 2)	T2 suspended	ALL tracks blocked from D-2
Track 2 at 13 pts (Rung 4)	T2 suspended	ALL tracks blocked; emergency plenary

Humanitarian Carve-Out: Track 4 DEEPENING-1 is NEVER blocked by failures in other tracks. Track 4 DEEPENING-2 is only subject to Track 1 (Nuclear) floor compliance — Track 2 and Track 3 failures do not block reconstruction.

Independent Verification Consortium (IVC)

Component	Role	Data Sources
IVC-A Primary Monitor	IAEA (Track 1); designated third-party body (Tracks 2–4)	Inspection reports, satellite imagery, SWIFT records, corridor tonnage, UN access logs
IVC-B JTC	2 technical reps per party review raw data, flag anomalies, submit assessments	IVC-A raw data; party alternative data; anomaly reports
IVC-C IAR	Independent statistical audit of CIS methodology; flags anomalies; public findings	All sub-score calculations; methodology audit trail

3. CIS Score System & Regression Ladder

CIS Threshold Table

Sub-Score Range	Status	Consequence
0 – 2 pts	Full Compliance	Eligible for auto-advance
3 – 4 pts	DEEPENING-1 Threshold	Auto-advance to next depth level
5 – 6 pts	Enhanced Monitoring	Bi-weekly assessments; benefits held at current level; 45-day remediation window
7 – 8 pts	Regression Rung 1 (Advisory)	Advancement frozen; bi-weekly assessments; benefits continue; 30-day remediation
8 – 10 pts	Regression Rung 2 (Suspension)	Benefits SUSPENDED; weekly assessments; cross-track coupling activates; 60-day remediation
10 – 12 pts	Regression Rung 3 (Rollback)	One-tier automatic rollback; 90-day remediation; public Joint Commission document
≥ 12 pts	Regression Rung 4 (Snapback)	Full snapback to BASELINE; 24–48 hours; UN Security Council notification (Track 1 only)
≥ 15 pts	Framework Emergency	Emergency plenary convened within 48 hours

Regression Ladder Summary

Rung	Trigger	Automatic Actions	Remedy Window
1 Advisory	7–8 pts	Advance frozen; bi-weekly IVC; formal Advisory Notice; 5-day acknowledgment required	30 days
2 Suspension	8–10 pts or Rung 1 uncured	Benefits suspended within 72h; weekly assessments; Remediation Plan required; public Suspension Notice	60 days
3 Rollback	10–12 pts or Rung 2 uncured	One-tier rollback (D-2 → D-1 → BASELINE); immediate benefit reduction; STAP oversight; reversible on return to ≤4	90 days
4 Snapback	≥12 pts or severe breach	Full snapback within 24–48h; maximum inspection surge; UN Security Council notification; 90-day curative period	90 days
Severe Breach	Weapons diversion, mass-casualty attack, deliberate famine blockade	Activates Rung 4 directly; bypasses Rungs 1–3; 24-hour response	90 days

Contested Data Protocol

Tier	Timeline	Action
Tier 1: Technical Challenge	Days 1–14	Written challenge to JTC; JTC convenes within 5 days; 14-day report; freeze on auto-advance/regression for affected Track
Tier 2: IAR Audit	Days 15–30	Independent Actuarial Reviewer conducts 15-day audit; finding is binding for current evaluation window
Tier 3: STAP Arbitration	Days 31–60	Standing Technical Arbitration Panel issues binding determination within 30 days; final on technical grounds

Ladder Exhaustion Rule

If a Track reaches Rung 4 a second time within any 18-month period, the framework enters a mandatory **Framework Integrity Review**. The Review panel (Joint Commission + IVC + IAR) assesses whether the framework remains viable and produces a public report within 30 days. The report does not have authority to terminate the framework, but its findings are submitted to all parties' heads of government.

4. Document 0 — The 90-Day Soft Start

First 30 Days Walkthrough

Day	Action	Lead
Day 1	Signature. All tracks activate at BASELINE. Day-One humanitarian sanctions freeze (SF-1) takes effect immediately. \$7B tranche 1 released to IMESI escrow.	All parties
Day 2–7	Joint Commission convenes. IVC monitors positioned. JTC sub-committees formed per Track. Triple hotline tested.	Joint Commission Chair
Day 8–14	First verification baseline established. Satellite imagery analysis configured. SWIFT/banking channels tested. Corridor logistics operationalized.	IVC-A / JTC
Day 15–30	First CIS scores published (informative only during Soft Start). Quiet Correction Window opened for any concerns. Public Narrative Kit distributed.	IVC / JCRP

Soft Start Principles

Principle	Rule
Non-punitive observation	Monitoring is active; scores are published; but no Regression Ladder activation and no benefit suspension during Soft Start.
Technical calibration	Parties may dispute methodology, challenge data points, and request IAR audit without penalty.
Political testing	Governments observe domestic reaction, test parliamentary appetite, and gauge media response.
Exit without stigma	Any party may withdraw within 90 days with no formal breach finding. Simply notify Joint Commission and benefits cease.

Minimum Compliance Floor (MF-1)

Three Absolute Conditions

1. **No nuclear expansion** (enrichment above 3.67%, new centrifuge installation, undeclared facility construction)
2. **No civilian attacks** (deliberate targeting of non-combatant populations, civilian infrastructure, humanitarian corridors)
3. **No aid diversion** (seizure or redirection of humanitarian supplies for military or political purposes)

If maintained, participation continues regardless of other disagreements. **Inactive status** (not expulsion) if floor is temporarily unmet.

Manual Override Windows (MO-1)

Type	Count/Year	Duration	Effect
Temporary Deferral	1	14 days	Freezes deadline; does not freeze benefits
Cooling-Off Period	2	30 days each	Pauses scoring; benefits continue at current level
Score Review	4	N/A	Requests IAR audit of specific sub-score calculation

Strictly limited, transparent, non-cumulative. Cannot be used for consecutive evaluation windows.

5. v8.6 Optional Modules (40 Total)

Wave 1: Resilience (10 Modules)

#	Module	Purpose	Key Feature
1	72-Hour Escrow	NU-Z: All enriched uranium above 3.67% to Oman/Pakistan escrow within 72 hours	Dormant civilian infrastructure preserved
2	Freedom of Navigation	MH-1: Boarding attempts trigger automatic Regression Rung 4	Dual-blockade resolution protocol
3	Direct Executive Link	NN.8.5: 6-hour no-intermediary hotline between heads of state	2 consultations per cycle
4	Resource-Backed Compliance	ER-B: \$7B baseline as performance-secured deposit; monthly CIS-linked tranche release	Security deposit model
5	IMESI Freeze	PZ-6: Verified wire transfer to non-state actor causes instantaneous full IMESI liquidity freeze	Automatic trigger
6	180-Day Preservation Hold	PF-9: Base Deep-Freeze extended from 90 to 180 days; maximum to 270 days	Guards against leadership collapse
7	Missile Inventory Cap	BM-4: Verified missile inventory capped at 1,500km; excess to monitored storage or technical conversion	Technical conversion option
8	Naval Off-Ramp	NR-X: Carrier Strike Group reduction linked to Tier 3 Security CIS scores	Self-sufficiency standard
9	Sovereign Debt	SL-C: Financial obligations registered as sovereign debt with IMF/World Bank	Successor governments bound
10	Joint Communications	NC-P: Peace Through Strength Lexicon; pre-verified non-inflammatory language; Joint Communications Review Panel	Pre-screening of public statements

Wave 2: Dignity (10 Modules)

#	Module	Purpose
11	CE-D: Strategic Energy Partnership	Reframes civilian nuclear as reciprocal technical partnership with joint governance, capacity-building, domestic characterization rights
12	PC-S: Symmetrical Monitoring	Extends CIS-relevant observation to all regional signatories; removes unilateral-targeting perception
13	SF-1: Day-One Humanitarian Freeze	Immediate freeze on medical, agricultural, aviation safety, environmental sanctions upon signature; independent of compliance milestones
14	SD-X: Coastal Defense Exemption	Categorical exemption for non-ballistic, short-range coastal defense systems from BM-4 restrictions
15	MR-J: Joint Maritime Research	Scientific and environmental cooperation mandate to IHTA; Joint Maritime Research Council with equal littoral-state representation
16	AR-G: Automatic Escrow Release	Pre-programmed financial consequence for unilateral withdrawal: IMESI escrow automatically releases to non-withdrawing parties as liquidation penalty
17	RL-I: Religious-Legal Recognition	Formally recognizes each party's binding domestic legal and ethical pronouncements as foundational pillar
18	CH-P: Cultural Heritage Protection	Permanent, unconditional protection for up to 20 designated sites per party; 5km buffer zones; UNESCO registration; survives framework termination
19	RI-D: Infrastructure Integration	Links IMESI corridor funding to joint railway, port, energy, digital connectivity projects
20	CW-P: Silent Consultation Window	Mandatory 48-hour confidential consultation before public Pattern of Concern designation; equal access for all parties

Wave 3: Structural (10 Modules)

#	Module	Purpose
21	WZ-P: Waltz Compliance Phasing	90-day benchmark-based implementation cycles with technical assistance triggers and graduated benefit transitions
22	VF-F: Verification Failure Fallback	Five-tier graduated response (technical clarification through Rapid Panel arbitration) before any sanctions consideration
23	TS-P: Third-Party Spoiler Attribution	Formal mechanism for attributing incidents to external state or non-state actors; prevents automatic blame of framework parties
24	DP-C: Domestic Political Disruption	Structured response for parliamentary delay, judicial challenge, media opposition, institutional non-cooperation
25	IA-M: Incentive Acceleration	Positive-reinforcement "Advancement Ladder" counterpart to Regression Ladder; exceeding benchmarks triggers accelerated benefits
26	PS-I: Private Sector Integration	Commercial contract sanctity guarantees for 12–24 months post-snapback; creates vested private-sector stakeholders
27	RD-P: Rapid Dispute Resolution	Dual-speed binding arbitration (72-hour urgent / 21-day standard) with public Precedent Registry
28	NP-C: Non-Precedent Clause	Any accommodation in one context is not treated as binding precedent; preserves sovereign negotiating flexibility
29	IV-P: IAEA Parity Visibility	Reframes all monitoring as standard NPT+Additional Protocol safeguards comparable to Brazil, Argentina, South Africa
30	SA-I: Sovereign Asset Irreversibility	150-day inertia buffer before reimposition; graduated snapback ladder; 50% asset retention; withdrawal-penalty escrow

Wave 4: Accessibility (10 Modules)

#	Module	Purpose
31	Document 0: Entry Protocol	5-page public-facing entry layer with 3-pillar structure (Security, Nuclear, Prosperity), 90-day Soft Start, First 30 Days walkthrough, simplified 4-State tracker
32	SS-1: Soft Start Protocol	90-day non-punitive observation phase with monitoring but suspended penalties
33	MO-1: Manual Override Windows	1 temporary deferral, 2 cooling-off periods, 4 score reviews per year per party
34	QC-1: Quiet Correction Default	Confidential, informal correction is the DEFAULT response; public designation only after quiet correction fails; media protection during correction windows
35	FC-1: Failure Without Collapse	Partial failure in one pillar does not collapse others; Selective Pause mechanism; Managed Transition with 60-day wind-down; no punitive exit
36	WB-1: Benefit Visualization	Single-page benefit matrix per party answering "What do we get, and when?" with plain-language explanations
37	NC-2: Public Narrative Coordination	4 standardized, pre-approved, non-inflammatory public messages for all parties; updated quarterly by JCRP
38	MA-1: Mediator Authority Charter	Sharp definition of what mediator CAN do (convening, procedural rulings, escalation recommendations) and CANNOT do (substantive decisions, unilateral enforcement, secret commitments)
39	MF-1: Minimum Compliance Floor	Three absolute conditions (no nuclear expansion, no civilian attacks, no aid diversion); inactive status if temporarily unmet
40	DM-1: Data Integrity Shield	Full methodology publication, raw data access, annual independent audit, confidence bands on all scores, anti-gaming safeguards

6. Key Optional Annexes

U.S. Alignment Package (Annex OO)

Module	Purpose
NU-Z	72-hour third-party escrow for enriched uranium above 3.67%
MH-1	"Freedom of Navigation" mandate; boarding attempts trigger automatic Regression Rung 4
NC-P	Direct Executive Link: 6-hour no-intermediary hotline
ER-B	\$7B baseline as performance-secured deposit; monthly CIS-linked tranche release
PZ-6	IMESI liquidity pool immediate freeze upon verified non-state actor transfer
PF-9	180-day Deep-Freeze base extension (90 to 180 days; max to 270 days)
BM-4	1,500km missile inventory cap with monitored storage or technical conversion
NR-X	Naval off-ramp: Carrier Strike Group reduction linked to Tier 3 Security CIS
SL-C	Sovereign Debt Encoding with IMF/World Bank registration
DC-2	Peace for Prosperity Domestic Entrenchment: interdependent economic success architecture

Hardening Modules (Annex NN)

Module	Purpose
IV-X Ghost Verification	Undisclosed secondary monitoring to detect concealment attempts
DR-A Algorithmic Dispute Resolution	AI-assisted pattern analysis for contested data
PF-9 Deep-Freeze State	Extended framework suspension during leadership transitions or regime change
EC-E Development Fund Escrow	Ring-fenced reconstruction funding surviving political shifts
KD-B Kinetic De-Escalation Buffers	Geographic separation protocols preventing accidental military contact
SO-F Shadow Observer Framework	Third-party civilian monitors with direct IVC reporting
AG-3 Humanitarian Air-Gap	Track 4 aid insulated from Track 1/2 regression penalties
NC-P Peace Through Strength Lexicon	Pre-verified non-inflammatory language for all public statements
SL-C Successor Liability Clause	Registered sovereign debt; successor governments bound

7. Regional Annexes (M–V) + Mandatory (W–HH)

Regional Optional Annexes

Annex	Subject	Activation
M	Hezbollah Disarmament and Integration Protocol	Phase 2 or 3 by RCC consensus
N	Houthi De-escalation and Integration Protocol	Phase 2 or 3 by RCC consensus
O	Sadrist Movement Political Integration	Phase 2 or 3 by RCC consensus
P	Coordination Framework Integration and PMF Reform	Phase 2 or 3 by RCC consensus
Q	Israel–Iran and Arab–Israeli Deconfliction	Essential for Phase 2; Optional for Phase 0/1
R	Syria De-escalation and Stabilization	Optional for Phase 2; Essential for Phase 3
S	Regional Economic Integration + Fordow IMIRC + IMESI	Highly Recommended; Optional for all phases
T	Regional Counterterrorism Cooperation Pillar	Essential for Phase 3; Optional for Phase 1/2
U	Humanitarian and Refugee Stabilization	Activates Automatically at Phase 0
V	Multi-Domain Arms Control (Naval, Cyber, Air Defense, Drones)	Optional for Phase 1/2; Essential for Phase 3

Mandatory Annexes (W–HH)

Annex	Subject	Status
W	Vital Improvements Integration and Governance Reform	Mandatory
X	Unauthorized Action Response Protocol	Mandatory
Y	Naval Crisis Management / Carrier Protocol	Mandatory
Z	Nuclear Stabilization Module (Civil-Grade Equilibrium 3.67%)	Mandatory
AA	Hostage Exchange and Detainee Recovery Protocol	Mandatory
BB	Lebanon Border Stabilization	Mandatory
CC	Gaza Governance and Reconstruction Bridge	Mandatory
DD	Iran Proxy Stabilization Window	Mandatory
EE	Red Sea Maritime Security	Mandatory
FF	Iraq Militia Freeze	Mandatory
GG	International Hormuz Transit Authority (IHTA)	Mandatory
HH	Treaty Resilience and Institutional Continuity Protocol	MANDATORY

Protocol Integration Summary

Mechanic	Source	RAMES Integration
Parallel Unilateral Steps	Protocol Beta	Annex L Section L.2A (Trilateral)
Stabilization Zone (30km geofenced buffer)	Protocol Beta	Annex BB Section BB.9 (Lebanon Border)
Capabilities-Based Verification	Protocol Beta	Annex BB Section BB.10 (Lebanon Border)
Tripartite Monitoring Mechanism (TMM)	Protocol Beta	Annex L Section L.2B (Trilateral TMM)
Civil-Grade Equilibrium (3.67% cap)	Protocol Alpha	Annex Z Section Z.7 (Nuclear Module)
Joint Maritime Coordination Center (JMCC)	Protocol Alpha	Annex GG Section GG.7 (IHTA Maritime)

8. Political Messaging & Neutrality

Framework Communications Doctrine

1. **Describe, don't diagnose:** Use technical descriptions ("uranium enrichment above internationally recognized levels") not political characterizations ("proliferation behavior")
2. **Party-neutral voice:** No provision applies to a specific named country. All provisions apply symmetrically.
3. **Forward-looking framing:** Emphasize what the framework *enables* not what it *prevents*
4. **Domestic legitimacy respect:** Never characterize any party's internal political processes negatively
5. **Avoid zero-sum language:** Use "mutual verification," "reciprocal assurance," "shared monitoring"

Track Framing for Public Communications

Track	Public Framing
Track 1 (Nuclear)	"Verified restraint that expands civilian opportunity"
Track 2 (Security)	"Coordinated de-escalation, not unilateral disarmament"
Track 3 (Economic)	"Performance-unlocked prosperity"
Track 4 (Humanitarian)	"Autonomous relief — insulated from political friction"

Pre-Approved Public Narratives (from NC-2)

Scenario	Message
Signing day	"Today we chose calibrated cooperation over zero-sum confrontation. Each party's commitments are verified, reciprocal, and reversible if performance changes."
Track advancement	"Track performance has met verified thresholds and cooperation has naturally deepened. No government announced capitulation — only verified compliance."
Regression concern	"The framework has built-in feedback mechanisms. A concern was flagged; technical teams are reviewing; quiet correction is the default response."
Partial failure	"One track is paused for technical clarification. Three tracks continue. This is by design — calibrated cooperation, not all-or-nothing diplomacy."

Neutrality Note (Applies to All Modules)

All v8.6 enhancements are drafted in framework-neutral language. No individual, administration, or domestic political faction is named. All provisions are institutionally binding, not personally binding. All modules are optional and activate only by Joint Commission consensus.

9. Quick Tables & Reference

IMESI Economic Architecture

Instrument	Amount	Condition
Baseline Release (Tranche 1)	\$7B	Upon signature; performance-secured deposit model
Milestone-Linked Tranches	\$10B–\$20B	Activates at full DEEPENING-2 success across all tracks
Humanitarian Escrow Expansion	\$2B	Conditional on corridor tonnage and access metrics
Mutual Pain Index	Variable	Both parties breaching = proportional shared cost
15-Year Oil Moratorium	Architecture	Long-term pricing stability mechanism
Performance Dividend	15% acceleration	Exceeding benchmarks triggers accelerated benefits

Arms Control Summary

Domain	Cap/Restriction	Verification
Ballistic Missiles	1,500km range cap; excess to monitored storage or technical conversion	IMIRC + satellite + JTC quarterly
Naval Forces	Carrier Strike Group reduction linked to Tier 3 Security CIS achievement	JMCC maritime logs + satellite
Cyber Operations	48-hour Silent Consultation Window before public attribution	Independent cyber forensics panel
Coastal Defense	Exempt from 1,500km cap; non-ballistic, short-range only; declaration required	Declaration + spot inspection
Drone/UAS	Transfer restrictions to non-state actors; end-use monitoring	Supply-chain tracking + JTC

Optional Nuclear Solution Tracks (v8.5)

Track	Depth	Benefit Package
Track A	Enhanced Verification	Accelerated benefit access; priority banking tier; technical cooperation credits
Track B	Stockpile Freeze + Custody	Full asset tranche acceleration; IMESI premium corridor access; energy grid partnership priority
Track C	Full Stockpile Export ("The Big Move")	\$25B+ accelerated asset release; full oil normalization; strategic banking partnership; reconstruction fund priority access

Entry Protocol Checklist

Day	Milestone	Verifier
Day 1	Signature; all tracks at BASELINE; \$7B tranche 1 to escrow; SF-1 sanctions freeze active	Joint Commission
Day 7	IVC monitors positioned; JTC sub-committees formed; triple hotline tested	Joint Commission Chair
Day 14	First verification baseline; banking channels tested; corridors operational	JTC / IVC-A
Day 30	First CIS scores (informative); Public Narrative Kit distributed; Quiet Correction Window open	IAR / JCRP
Day 60	Mid-Soft Start review; Strategic Imbalance Review if needed	Joint Commission
Day 90	Soft Start concludes; full scoring activates; first auto-advance eligibility assessment	IVC / Joint Commission

10. Negotiator Checklist

Before the Table

Item	Check
Read Document 0 (5-page simplified framework with 3-pillar structure)	☐
Understand your party's Track weights and deepening triggers	☐
Identify which optional modules your capital wants activated (from 40 options)	☐
Review which annexes are mandatory (W–HH) vs. optional (M–V, OO, NN)	☐
Prepare domestic ratification timeline (90-day Soft Start buffer)	☐
Confirm Manual Override allocation strategy (1 deferral + 2 cooling-offs + 4 reviews per year)	☐
Review Public Narrative Kit (NC-2) for approved messaging	☐
Pre-position IVC monitor access arrangements and JTC representative selection	☐

At the Table

Item	Check
Confirm Cross-Track Coupling Clause is understood (DEEPENING-2 gate)	☐
Verify Minimum Compliance Floor (no nuclear expansion, no civilian attacks, no aid diversion)	☐
Negotiate specific module activation sequence (which modules trigger at signature vs. DEEPENING-1)	☐
Confirm IMESI escrow release schedule and performance-secured deposit terms	☐
Agree on mediator authority boundaries (convening only; no substantive decisions per MA-1)	☐
Secure commitment to Quiet Correction Window as DEFAULT response (QC-1)	☐
Confirm Failure Without Collapse applies (FC-1: one track failure does not collapse others)	☐

Signature to Day 90

Item	Check
Submit cultural heritage site nominations (20 per party; 5km buffer zones per CH-P)	☐
Designate JTC representatives (2 per party; non-ministerial technical experts per IVC-B criteria)	☐
Establish direct executive link (6-hour consultation capability per NC-P)	☐
Activate preferred optional modules by Joint Commission consensus	☐
Schedule first Strategic Imbalance Review if Track progress diverges >180 days	☐
Request first IAR audit if any CIS methodology concerns arise (DM-1)	☐

Remember

"Reciprocity Builds Resilience."

This framework is designed to survive domestic political transitions, external shocks, and temporary setbacks. The architecture preserves dignity for all parties, creates vested economic stakeholders, and ensures that no single failure collapses the entire structure. Use the Manual Overrides, respect the Quiet Correction Window, and trust the decoupled scoring to keep humanitarian relief flowing even when security tracks stall.

All modules are optional. All activate only by Joint Commission consensus. All provisions apply symmetrically. No individual, administration, or domestic political faction is named.
