RAMES

Negotiator's Quick Reference

v9.1 — April 2026

Reciprocal Accord for Middle East Stability

15-Point Core Treaty + 6 Optional Annexes

Coordinated Motion · Verified Steps · Human-Authorized Escalation

"Stability Through Coordinated Motion"

9.1

Contents

1. Framework at a Glance

Core Doctrine

"Coordinated Motion" — Every obligation is paired with a corresponding obligation on the other side. Cycles advance together. Neither party moves alone. All commitments are verified before benefits release. Escalation requires human authorization at each step.

Element	What It Means for Negotiators
Core Treaty + Optional Annexes	Bilateral Iran–U.S. core (15 Points + Annexes A–G). Six regional Optional Annexes adoptable independently. Optional Annex failure does not collapse the Core Treaty.
3-3-3-2-1 Calibration	15 points arranged symmetrically: Iran Core (3), U.S. Core (3), Iran Institutional (3), U.S. Compliance (3), Joint Floor (2), Joint Governance (1). Neither party dominates.
8 Implementation Cycles	90-day blocks with 30-day assessment + 60-day implementation. Green (all met), Amber (75–99%), Red (50–74%), Black (<50%). No cycle advances without verified reciprocal completion.
WBI Scoring	Weighted Breach Index: Nuclear 3.0 pts/event, Missile/Proxy/Maritime 2.0 pts, Other 1.0 pt. Advisory at 5.0; Review at 8.0. Every consequence above advisory requires JIG human authorization.
Human-Authorized Escalation	No sanctions consequence beyond Step 1 Advisory activates without explicit JIG vote. Step 1 self-activating. Steps 2–3 require deliberate human decisions.
150-Day Inertia Buffer	Standard reimposition requires 150 days minimum (JIG 30d + wind-down 60d + banking 60d). Emergency fast-track available only for clearly defined material breach under Annex F.
Public Dignity Recitals	Integral operative provisions. No party implies capitulation, defeat, or acknowledgment of wrongdoing. Each retains right to characterize compliance in own domestic terms.
Minimum Viable Agreement	Tier 1 Core enters force 72 hours after signature. Tier 2 Nuclear Core at Day 30. Tier 3 Full Core at Day 90. Optional Annexes enter force independently upon adoption.

2. The 15 Points (3-3-3-3-2-1)

Calibration Table

Track	Points	Description
IRAN CORE	1, 2, 3	Permanent end of hostilities · Compliance-based use-of-force restraint · Non-interference in constitutional governance
U.S. CORE	4, 5, 6	Verified enrichment cap + 60% disposition · Fordow conversion to IPMIRC · Enhanced IAEA inspection regime
IRAN INSTITUTIONAL	7, 8, 9	Staged sovereign asset return · International Hormuz Transit Authority · Recognition of peaceful nuclear energy right
U.S. COMPLIANCE	10, 11, 12	Phased sanctions relief · Regional security dialogue protocol · Energy market reintegration
JOINT FLOOR	13, 14	Structured ceasefire and crisis management · Durable domestic non-proliferation legislation
JOINT GOVERNANCE	15	Joint Implementation Group with human-verified escalation, resilience architecture, dispute resolution

Part I: Iran Core Positions (Points 1–3)

Point	Provision	Key Operative Element
1	Permanent Cessation of Hostilities	Binding bilateral treaty under UN Article 102; all direct kinetic operations cease on signature; Article 51 preserved; regional non-state actor activities addressed separately through Point 11
2	Compliance-Based Use-of-Force Restraint	U.S. commits not to initiate military action against Iran upon IAEA certification of compliance; Israeli permanent observer to JIG with full speaking rights; Congressional notification before major operations; suspension only upon JIG material breach determination or IAEA access lapse >90 days
3	Non-Interference in Constitutional Governance	Defined prohibited activities: financial support to opposition, cyber on electoral infrastructure, physical sabotage, coordinated disinformation, support for coups. Permitted: intelligence on military capabilities, diplomatic pressure, public criticism, academic analysis, civil-society human-rights support. Confidence-building: protected consular channel, academic exchange, cultural heritage protection (20 sites per party)

Part II: U.S. Core Positions (Points 4–6)

Point	Provision	Key Operative Element
4	Verified Enrichment Cap + 60% Disposition	Suspension above 3.67% within 30 days; stockpiles capped at 300 kg UF ₆ ; 60% stockpile: Tranche 1 (50%) Days 1–90, Tranche 2 (50%) Days 91–365. Research program: 164 IR-1 centrifuges preserved at Natanz. Reconversion requires JIG unanimous consent + IAEA DG certification. Technical lapse (<45 days) is not material breach.
5	Fordow Conversion to IPMIRC	International Persian Gulf Medical Isotope Research Center; military personnel withdraw within 90 days; \$200M+ annual revenue; WHO/IAEA advisory board; 40% of regional medical isotope demand within 5 years
6	Enhanced IAEA Inspection Regime	Additional Protocol ratification + challenge inspections; 48-hour standard notice, 72-hour during pre-declared sensitive periods (max 30 days/year); Iranian observer accompanies all challenge inspections; managed access for military sites (physical access, environmental sampling, or remote monitoring); annual proportionality review; multi-party intelligence liaison at IAEA HQ

Part III: Iran Institutional (Points 7–9)

Point	Provision	Key Operative Element
7	Staged Return of Frozen Sovereign Assets	5 tranches: 25% signature, 25% Day 30, 20% Day 90, 15% Day 180, 10% Day 365, 5% reserve. Congressional review before Tranches 3–5. Withdrawal-penalty escrow: Iran retains 50%+ if U.S. reimposes outside JIG process. 150-day inertia buffer. IMF/World Bank sovereign debt registration.

8 International Hormuz Transit Authority (IHTA)	Permanent Council: Iran, U.S., GCC rotating chair, EU observer, China observer, UN neutral chair. Navigation Service Charges: Tier 1 humanitarian (zero), Tier 2 commercial (\$0.15/ton), Tier 3 energy (\$0.25/ton). Revenue: 40% Iranian Civilian Reconstruction Fund, 35% Maritime Safety, 25% operations. 24-month provisional phase before permanent authority.
9 Sovereign Right to Peaceful Nuclear Energy	Section 123 Agreement launched Day 1; guaranteed fuel supply at market rates; multilateral fuel-bank backstop (Kazakhstan LEU Bank or equivalent); Senate-failure fallback ensures supply regardless of ratification; Strategic Energy Partnership framing; religious-legal pillar recognition (fatwa as state policy)

Part IV: U.S. Compliance Track (Points 10–12)

Point	Provision	Key Operative Element
10	Phased Sanctions Relief	Day-One humanitarian relief unconditional (medical, food, aviation, environmental). Phase 1 (Days 1–90): first sanctions tranche, aviation licenses, 50% asset release, SWIFT reconnection. Phase 2 (91–180): Tier 2 banking, oil services licensing. Phase 3 (181–365): remaining nuclear sanctions. Year 2+: full relief, Tiers 3–4 banking, 15-year oil moratorium. Snapback: human-verified, graduated (Step 1 Advisory, Step 2 Partial Restriction, Step 3 Emergency Fast-Track).
11	Regional Security Dialogue Protocol	Ballistic missile capabilities acknowledged as sovereign defense prerogative; not addressed by accord. Parallel confidential protocol (3 years, renewable): Year 1: cessation of advanced weapons transfers to designated non-state actors; Year 2: 50% Quds Force external reduction; Year 3: full transition to advisory status. Firewall: first 50% of assets and all humanitarian relief not contingent on parallel-protocol milestones.
12	Iranian Energy Market Reintegration	Oil export capacity 2.0–2.5M bpd within 24 months; U.S. firms 25% of new field development (South Pars, Azadegan) under EITI tendering; 15-year oil moratorium with automatic 5-year extensions; moratorium survives even if nuclear provisions lapse unless material breach verified

Part V: Joint Minimalist Floor (Points 13–14)

Point	Provision	Key Operative Element
13	Structured Ceasefire + Crisis Management	Five independent de-escalation pathways: Crisis Lock (14 days, extendable to 42), Third-Party Shock Absorber (30-day TSAP investigation), Military Deconfliction Hotline (24/7), Regional Incident Firewall (4-hour JIG notification, 24-hour bilateral consultation), Direct Executive Link (6-hour head-of-state consultation). All require human authorization above advisory level.
14	Durable Domestic Non-Proliferation Framework	Iranian Majlis legislation criminalizing nuclear weapons (20-year penalties); independent civilian oversight council; automatic UNSC referral for fissile diversion; Guardian Council or Assembly of Experts fatwa validation; fissile material above 300 kg to IAEA-supervised custody (Oman, Pakistan, Switzerland, Kazakhstan + IAEA consortium); continuous IAEA presence; graduated escalation for other concerns (30-day remediation before UNSC)

Part VI: Joint Governance (Point 15)

Element	Specification
JIG Composition	Co-chairs: Iranian Foreign-Minister-level; U.S. Deputy Secretary-level; neutral chair (18-month renewable, pool: Switzerland, Sweden, Singapore, Brazil, Oman). 30-person neutral Secretariat.
Cadence	Weekly working-level; monthly plenary; emergency within 24 hours; quarterly comprehensive review with public summary; annual performance report.
Israeli Observer	Permanent observer with full speaking rights on Iran-related security matters. No formal vote on nuclear/sanctions/asset decisions. Expedited-review requests subject to 30-day cooling-off if >1 request per 30 days.
Decision Levels	L0 Technical (no consequence); L1 Advisory (co-chairs acknowledge, enhanced monitoring); L2 Partial Restriction (JIG majority); L3 Enhanced Review (JIG 2/3); L4 Snapback (unanimous or Emergency Fast-Track / Presidential certification); L5 Arbitration (UN SG referral)
Resilience	Domestic Political Disruption Hold (30–60 days, benefits at 50%, max 1 per 12 months); Technical Lapse Protocol (up to 45 days, no rollback); Force Majeure (30 days, benefits at 50%); Election Quiet Period (60 days pre + 30 days post, sensitive measures deferred, max 2 per 5 years); Performance Acceleration (15% benefit acceleration or half-cycle advancement); Succession Continuity (90-day pause, treaty remains in force)

3. Entry into Force & Minimum Viable Agreement

Tiered Entry Structure

Tier	Provisions	Entry Condition	Force Timing
Tier 1 — Minimum Core	Point 1 (Cessation), Point 14 (Non-Proliferation Legislation), Point 13 (Ceasefire Architecture), Point 15 (JIG Governance), Point 4 (Enrichment Cap, initial), Annex D (Crisis Management)	Signature and exchange of instruments	72 hours after signature
Tier 2 — Nuclear Core	Tier 1 + Points 5, 6, 7, 8, 9 + Annexes A, B, C	IAEA deployment confirmation + JIG inaugural session	Day 30
Tier 3 — Full Core Treaty	Tiers 1–2 + Points 2, 3, 11, 12 + Annexes E, F, G	Verified enrichment cap + Day-One humanitarian freeze + Asset Tranche 1	Day 90
Optional Annexes	OPT-1 through OPT-6 as adopted	Written adoption by all parties named in that annex	Independent per annex

Core Treaty Independence Guarantee

If any Optional Annex fails to enter force, is suspended, or is terminated, the Core Treaty and all other Optional Annexes that have entered force remain **fully operative without modification**. No party may invoke Optional Annex failure as grounds to suspend, terminate, or renegotiate Core Treaty obligations.

Non-Precedent Clause

This accord does not constitute precedent for other nuclear-capable states or regional conflicts. Neither party may cite it in proceedings concerning other states without mutual written consent. The JIG maintains a **Precedent Firewall Register** documenting external citation attempts.

4. Eight Implementation Cycles

Cycle	Days	Iran	United States	Joint
0 — Foundation	1–30	Declare facilities; SNSC ratification; Guardian Council review	Banking Tier 1; Day-One humanitarian relief; 123 Agreement launched	JIG established; crisis hotline; Direct Executive Link tested
1 — Verification	31–90	IAEA baseline; enrichment cap (3.67%) verified	Asset Tranches 1–2 (50%); SWIFT; aviation parts	First quarterly review; Rapid Dispute Panel test; TSAP exercised
2 — Disposition	91–180	60% Tranche 1 exported/downblended; Fordow conversion begins; EITI filed	Asset Tranche 3 (20%); Tier 2 banking; oil services licensing	Year-one parallel-protocol milestone verified
3 — Consolidation	181–365	Stockpile cap verified; Fordow 50% converted; 60% Tranche 2 complete	Asset Tranches 4–5 (25%); remaining nuclear sanctions relief	Regional Coordination Council operational
4 — Normalization	Year 2	Full Additional Protocol active; civilian oversight council; oil to 2.0M bpd	Full nuclear sanctions relief; Tiers 3–4 banking; 123 Agreement to Congress	Security guarantee fully operative
5 — Integration	Year 3	Parallel-protocol Year 1 complete; regional dialogue active	Strategic banking; 15-year moratorium; public parallel-protocol annex	Permanent IAEA presence; transition to maintenance framework
6 — Stabilization	Year 4	Quds Force external deployment reduction verified	Annual congressional certification; reconstruction co-financing	Annual JIG review; Fordow conversion complete
7 — Maintenance	Year 5+	Quds Force transition to advisory complete; oil at 2.5M bpd	Treaty review conference; renewal assessed	First maintenance assessment; IHTA review at Month 24

Cycle Transition Logic

Color	Benchmark Met	Advancement	Benefits
Green	All benchmarks met	Advance with full benefits	100%
Amber	75–99%	Advance with reduced benefits	80%
Red	50–74%	Hold; no new benefits	50%
Black	<50%	Freeze; no new benefits; JIG enhanced review	0%

5. WBI Scoring & Human-Authorized Escalation

Weighted Breach Index (WBI)

Domain	Points per Event	Advisory Threshold	Review Threshold
Nuclear	3.0	5.0	8.0
Missile transparency (if active)	2.0	—	8.0
Affiliated group / regional	2.0	—	8.0
Maritime	2.0	—	8.0
Other (information, banking)	1.0	—	—

Pattern of Concern Designation

Three or more categories of concerning activity across two cycles demonstrating coordinated intent. Before public designation: **48-hour confidential consultation window** for technical clarification. Equal access for all parties. Designation requires JIG 2/3 vote.

Graduated Snapback Steps

Step	Threshold	Human Authorization	Effect
1 — Advisory Notice	WBI 5+	JIG co-chairs acknowledge — <i>only self-activating step</i>	Enhanced monitoring; advancement frozen; formal notice
2 — Partial Restriction	WBI 8+; or 2 minor + 1 major breach; or Pattern of Concern	JIG majority vote — <i>human decision required</i>	Targeted sector restrictions; new banking tier review; published JIG determination
3 — Emergency Fast-Track	Clearly defined material breach under Annex F; or WBI 12+	JIG 2/3 supermajority; or Presidential certification to Congress with 48-hour notice — <i>human decision required</i>	Full snapback consideration; asset freeze reversal (subject to PSILP protections)

Human Verification Requirement

No sanctions consequence beyond Step 1 activates without explicit human authorization. Step 1 is the only self-activating step. Steps 2 and 3 require deliberate JIG decisions. This ensures no automated cascade from technical anomaly to economic rupture.

6. Crisis Management: Five De-Escalation Layers

Mechanism	Activation Trigger	Human Authorization to Escalate	Maximum Duration
Crisis Lock	10+ party-national fatalities; verified direct military clash; critical infrastructure attack; IAEA integrity alert	JIG emergency session within 48h; fact-finding team within 72h; extension requires JIG majority	14 days; extendable to 42 days
Third-Party Shock Absorber	Third-party attack or spoiler activity	Attribution panel determines sponsorship before any bilateral penalty; non-attributable = no penalties — JIG certified	30-day investigation window
Military Deconfliction Hotline	Any military incident	Preliminary de-escalation guidance before political authorization required; no escalation authorized by hotline alone	Permanent 24/7
Regional Incident Firewall	Third-party regional escalation threatening framework	JIG notification within 4 hours; bilateral consultation within 24 hours; coordinated statement within 48 hours	Immediate
Direct Executive Link	Imminent crisis requiring head-of-state communication	Pre-established secure channel; 6-hour consultation capability	On-demand

TSAP: Third-Party Spoiler Attribution Protocol

Independent review panel with named neutral third-party expert from standing roster (retired heads of international arbitration institutions; rotates quarterly). Classification within 72 hours:

1. State-sponsored
2. Proxy with state backing
3. Independent non-state actor
4. Inconclusive

Default rule: Investigation remains inconclusive after 10 days = classified **Non-Attributable**. No bilateral penalty applies. Response limited to cooperative threat mitigation.

Why Five Layers Matter

Historical analysis shows frameworks fail not from deliberate policy reversal but from a single ambiguous incident that neither side has adequate institutional tools to manage. Five independent pathways to de-escalation, each requiring human authorization before any escalatory consequence activates.

7. Core Annexes A–G

Annex	Title	Purpose
A	Implementation Sequencing	Eight 90-day cycles with 30-day assessment + 60-day implementation. Green/Amber/Red/Black transition logic. No cycle advances without verified reciprocal completion.
B	Verification Architecture	7-layer verification stack (IAEA continuous, periodic, challenge, national technical means, supply-chain tracking, JTC, IAR). VIU state (Verification Integrity Uncertain) triggers fallback ladder, not escalation. WBI scoring methodology. Pattern of Concern designation protocol.
C	Economic and Sanctions Architecture	4-tier banking channel (Humanitarian 24h, Essential 72h, Advanced 7-day, Strategic 30-day). PSILP (Private Sector Integration Lock-In): 24-month contract protection post-snapback. 150-day inertia buffer. Mutual accountability mechanism. Performance dividend (15% acceleration).
D	Crisis Management and Human-Verified Escalation	Crisis Lock (14+28 days). TSAP with named neutral expert. Domestic Political Disruption Hold (30–60 days). Graduated Exit Pathway (partial 60-day notice; full 12-month transition). Cascade Prevention Protocol (10-day JIG assessment before multi-mechanism response).
E	Public Implementation Dashboard	Quarterly Compliance Transparency Summary (CTS): WBI score with trend, active mechanisms list, cycle progress, benefits delivered, compliance snapshot, next milestone, risk register. Published in 4 languages within 7 days of cycle close.
F	Material Breach: Tightly Defined Scope	Only 6 events constitute material breach for snapback: enrichment above 3.67%, fissile diversion, systematic IAEA denial >45 days, direct armed attack on U.S. personnel, Hormuz closure without authorization, U.S. reimposition without JIG authorization. Events that do NOT constitute breach: technical delays with good faith, domestic political turbulence, third-party spoilers, verification anomalies, rhetorical statements.
G	Dispute Resolution Hierarchy	5 tiers: Technical Working (14 days, non-binding), Rapid Dispute Panel (72h urgent / 21d standard, binding), JIG Mediation (30 days), Ministerial Review (60 days), UN Binding Arbitration. Dispute Exhaustion Rule: no Tier 4–5 without Certificate of Exhaustion. Precedent Registry with 5-year mandatory review.

Verification Failure Fallback Ladder (Annex B.3)

Stage	Days	Action	Benefit Level
1 — Technical Remediation	1–7	Joint technical team within 48h; sensor repair; backup data reconstruction; daily JIG reporting	100%
2 — Substituted Verification	8–14	Alternative methods: satellite, environmental sampling, logistics records, commercial imagery; expanded challenge inspections	100%
3 — Limited Compliance Assumption	15–30	Temporary assumed compliance within established bounds; enhanced monitoring at Stage 1 intensity	75%
Hard Deadline	Day 30	If verification not restored: JIG convenes within 14 days to determine whether WBI escalation is warranted — <i>human decision required</i>	Standard JIG process

8. Optional Annexes 1–6

OPT-1: Trilateral Stability (Israel–Lebanon–Hezbollah)

Phase	Element	Key Provision
First-Round	Deconfliction + Civilian Protection	Permanent Blue Line cessation; Joint Antagonism Management Commission at Naqoura; International Attack Attribution Tribunal at The Hague (72h classification, default non-attributable); Joint Civilian Protection Command in Tyre (Hezbollah Civilian Protection 30%, Lebanese Civil Defense 35%, UN OCHA 20%, ICRC 15%); \$500M Civilian Casualty Insurance Pool; 24/7 Military Deconfliction Hotline
Second-Round	Institutional Integration + Territorial Restoration	LAF registration and amnesty (60 days); \$8B Sovereign Transition Fund; 5km JSRZ (LAF 45%, Hezbollah-registered 30%, international 25%); Shebaa Farms (Day 61), Kfar Shouba (90 days), Northern Ghajar (immediate); 7-year phased Israeli withdrawal; \$2B LAF capacity-building; \$2B reparations; \$1B southern reconstruction
Israel Resilience	Civilian Protection Architecture	Hardened shelter mandate (50km zone, 80% subsidy, 5-year deadline); National attack insurance pool (government subsidies 60% business / 40% residence); Layered interception (Iron Dome + drone defense 95%); Pre-programmed proportionate response with 10-minute human oversight
Governance	Trilateral Coordination Commission	9 members (3 Israeli, 3 Lebanese, 2 Hezbollah political, 1 UN chair). 72-hour Cooling-Off mandate. 10-level escalation ladder. Consensus default; 7/9 weighted majority when elusive.

OPT-2: Yemen (Coalition and Houthi Track)

Phase	Days	Action
1	1–60	Ballistic and cruise missiles removed to declared storage under UN verification
2	60–180	Long-range armed drone inventory reduced 60%; excess to UN custody or destroyed
3	180–365	Rocket artillery limited to 75km range with technical modifications verified by UN
4	365–730	Negotiation of permanent regional missile/drone limitation regime

UN Coalition Security Monitoring Mission: HQ Abu Dhabi; 5,000 personnel; SC mandate; random facility access; quarterly briefings. Houthi naval limited to 24nm coastal zone.

Political Integration: Houthi party registration with proportional legislative representation; Saada autonomous administration; permanent-status referendum at year five under UN supervision.

Yemen Reconstruction Trust: \$35B over 10 years (GCC 50%, EU 20%, U.S. 10%, IFIs 20%). No sectarian discrimination.

OPT-3: Gaza Reconstruction and Palestinian Track

Element	Specification
Gaza Reconstruction Trust	\$53B over 10 years: GCC \$25B, EU \$15B, U.S. \$5B, IFIs \$5B, UN/private \$3B. Staged against governance milestones.
Technocratic Interim Administration	Palestinian-led, UN-supervised, 36-month renewable. Independent professionals with international advisors. Preparation for elections at month 36.
DDR	All armed factions submit to UN-supervised DDR. Options: integration into Palestinian security force (UN-vetted); civilian reintegration (\$15K–\$40K stipend); emigration to third countries. Heavy weapons to UN custody; tunnels sealed. Reconstruction flows only to demilitarized areas.
Coastal SEZ	Port access, desalination, solar power, customs-free industrial zones. UN naval observation. Israeli technical cooperation through neutral channels.
Political Horizon	Two-state framework reaffirmed; Quartet-sponsored negotiating tracks. Right-of-return joint commission with \$5B initial compensation fund. Refugee documentation and resettlement. Jerusalem deferred to final status; holy sites status quo maintained.

OPT-4: Iraq, Syria, and GCC Regional Integration

Element	Specification
Iraq	\$3B capacity-building (U.S. 30%, EU 25%, GCC 25%, Iran 10%, UN 10%). PMF transition over 36 months: integration into ISF, civilian reintegration (\$10K–\$30K), Border Guard Force. KRG constitutional status preserved; oil revenue-sharing codified. World Bank anti-corruption reforms.
Syria	\$45B Reconstruction Trust over 15 years (GCC 40%, EU 30%, IFIs 15%, U.S. 10%, UN 5%). Tied to political-transition benchmarks. Voluntary refugee return with host-state burden-sharing. Property restitution courts (hybrid UN mechanism). Joint ISIS Counter-Terrorism Coordination Cell.
GCC Integration	Iran-GCC bilateral normalization (ambassador exchange, aviation, pilgrimage). Persian Gulf maritime cooperation (joint coast-guard, pollution response, AIS sharing with IHTA). Energy infrastructure (LNG cooperation, petrochemical joint ventures, renewable interconnection). Cultural/academic exchange.
RCC	Regional Coordination Council: U.S., Iran, Israel, Lebanon, Saudi Arabia, UAE, Qatar, Oman, Bahrain, Kuwait, Egypt, Iraq, Syria, Jordan; Turkey and EU observers; UN observer. Quarterly ministerial. Standing working groups on maritime security, CT, energy, environment, refugees, infrastructure. Consensus decisions; non-binding recommendations forwarded to JIG for binding adoption.

OPT-5: Regional Economic Dividend & OPT-6: Treaty Resilience

Mechanism	Scale	Recipient	Trigger
Frozen asset return	\$50B over 365 days	Iran (sovereign)	Phased tranches on verified compliance
IHTA Reconstruction Fund	\$200M/year	Iran (infrastructure)	IHTA Navigation Service Charges
IHTA Maritime Safety Fund	\$175M/year	Joint regional	IHTA Navigation Service Charges
Day-One humanitarian relief	Immediate	Iran (population)	Signature
123 Agreement fuel-cycle market	\$10–20B	Iran	Signature + 30 days
IPMIRC medical isotope revenue	\$200M+/year	Iran	Fordow conversion (Year 2)
U.S. energy-field access (25%)	\$50–100B over 15 years	U.S. firms	Phase 2; competitive tendering
LAF capacity-building	\$2B over 7 years	Lebanon (LAF)	Phased withdrawal milestones (OPT-1)
Civilian casualty insurance pool	\$500M	Israeli + Lebanese civilians	JSRZ activation (OPT-1)
Reparations — disputed territories	\$2B over 10 years	Lebanon	Territorial restoration (OPT-1)
Yemen Reconstruction Trust	\$35B over 10 years	Yemen	Cross-border cessation (OPT-2)
Civilian harm fund (Yemen)	\$6B combined	Yemeni + Coalition civilians	Signature
Gaza Reconstruction Trust	\$53B over 10 years	Palestinians	Governance milestones (OPT-3)
Syria Reconstruction Trust	\$45B over 15 years	Syria	Political-transition benchmarks (OPT-4)
Iraq capacity-building	\$3B	Iraq	Signature

OPT-6: Treaty Resilience and Succession Continuity

All treaty obligations survive changes in leadership. In contested succession or institutional vacuum, the JIG maintains administration until recognized authority resumes. Extra-constitutional change: 30-day review period before any suspension. If two or more Iranian signatories incapacitated simultaneously, JIG neutral chair (with Oman and Switzerland) identifies senior surviving official for provisional accreditation. 90-day pause; treaty remains in force.

9. Domestic Messaging & Dignity Recitals

Five Public Dignity Recitals (Integral Operative Provisions)

For	Recital
Iran	Nothing implies Iran's nuclear activities were unlawful, that Iran lacked sovereign right to peaceful enrichment, or that Iran's security posture was unjustified. Iran's acceptance of verified limitations is a sovereign exercise of choice in exchange for concrete reciprocal benefits. Iran characterizes obligations in whatever domestic terms best serve constitutional processes and national dignity.
United States	Nothing implies U.S. policy toward Iran was mistaken, that sanctions were unjustified, or that U.S. security commitments to regional partners are diminished. The U.S. characterizes this as securing the most comprehensive and verifiable non-proliferation outcome achievable, with all sovereign defense capabilities preserved.
Iran (Financial)	The return of frozen Iranian sovereign assets constitutes the restitution of Iranian property to its lawful owner. It is not a payment, compensation, or concession by the United States. It is not a reward for any conduct. No party may characterize it otherwise.
Both (IAEA)	IAEA monitoring is conducted pursuant to internationally standardized safeguards comparable to Brazil, Argentina, South Africa, Japan. Monitoring represents standard compliance parity, not exceptional surveillance. Both parties commit to this characterization.
All Regional (Optional Annexes)	No Optional Annex requires any party to acknowledge that its prior conduct was illegitimate, that its resistance activities were unjustified, or that its security concerns were invalid. Integration, registration, and institutional participation are sovereign choices made in exchange for defined reciprocal benefits.

U.S. Positioning Guidance

Audience	Message
Security legislators	Enrichment zeroed at threshold. 60% stockpile eliminated in 12 months. Fordow converted permanently. Inspectors access any site with cause. Article 51 preserved. Snapback requires JIG authorization; emergency fast-track for material breach.
Foreign-policy realists	Declared end to costly conflict with preserved deterrence, competitive commercial access to major energy market, 15-year oil moratorium creates durable entanglement, Hormuz open permanently.
Budget legislators	No new appropriation. Asset releases are unfreezing Iranian sovereign property, not U.S. expenditure. Congressional review at each major tranche. Quarterly compliance certification to SFRC/HFAC.
Israel-aligned	Israel in every Iran-related review. Article 51 preserved. Hezbollah external patronage severed. Iran enrichment below weapons threshold.

Iran Positioning Guidance

Audience	Message
Security establishment	Sovereign right to peaceful nuclear energy formally recognized. 164 IR-1 research centrifuges preserved. Ballistic missile program not addressed. Non-interference in constitutional governance binding. Fatwa recognized internationally as state policy.
Economic interests	Frozen sovereign assets returned with escrow protection. Sanctions relief across staged timeline. Full oil export restored. EITI accession unlocks financing. Fordow generates \$200M+ annual medical isotope revenue.
Religious establishment	Fatwa codified in domestic statute. No theological extension required. Fordow transformation to medical isotope center for regional healthcare is a sovereign achievement.
General public	Humanitarian sanctions lifted on Day One before any compliance milestone. Closes chapter on costly conflict, opens Iranian participation in regional trade and reconstruction.

10. Red Lines & Material Breach

Preserved Red Lines

Party	Preserved Red Lines
United States	(1) Article 51 self-defense rights. (2) Emergency fast-track snapback for material breach. (3) Congressional review over each major asset tranche. (4) All existing treaty obligations to regional allies. (5) Intelligence collection on military capabilities.
Islamic Republic of Iran	(1) Sovereign right to peaceful nuclear energy including 3.67% enrichment and 164 IR-1 research program. (2) Ballistic missile capabilities not addressed. (3) Constitutional governance processes (Guardian Council, Assembly of Experts). (4) Non-interference in internal affairs. (5) Right to characterize compliance domestically in any terms consistent with meeting objective benchmarks.
Israel	(1) Article 51 self-defense rights. (2) Freedom to conduct intelligence on military capabilities. (3) No JIG authorization required for responses to active armed attack. (4) Right to maintain all existing defense systems. (5) No obligation to recognize or engage directly with non-state armed actors.
All Parties	(1) No annex automatically collapses Core Treaty. (2) No Optional Annex enters force without explicit adoption. (3) Core obligations (ceasefire, IAEA monitoring, fissile custody, Hormuz coordination) continue regardless of partial withdrawal, escalation, or annex dispute.

Annex F: Material Breach (Tightly Defined)

Category	Event	Fast-Track Available
Nuclear	Enrichment above 3.67% at any declared or undeclared site, verified by IAEA	Yes
Nuclear	Diversion of fissile material to undeclared sites or weapons-related activity, IAEA-certified	Yes
Nuclear	Systematic denial of IAEA access at declared sites for >45 days without JIG-approved justification	Yes
Military	Direct armed attack on U.S. military personnel or facilities, JIG-attributed	Yes
Economic	Unilateral Iranian closure of Hormuz transit to commercial shipping without JIG authorization	Yes
Economic	U.S. reimposition of sanctions without JIG authorization and without material breach in above categories	Yes — for Iran's proportionate suspension

What Does NOT Constitute Material Breach

- Technical delays in milestone completion where good faith is demonstrated (Technical Lapse Protocol applies)
- Domestic political turbulence preventing implementation (Domestic Political Disruption Hold applies)
- Third-party spoiler events not attributed under TSAP
- Verification system anomalies pending TSAP or VIU investigation
- Disagreements about interpretation pending Rapid Dispute Panel resolution
- Rhetorical statements or media characterizations inconsistent with agreed framing, absent operational breach

11. Quick Tables & Checklist

Banking Channel Architecture (Annex C.1)

Tier	Purpose	Clearance
1 — Humanitarian	Medicine, food, medical equipment, aviation safety, environmental	24-hour; zero service charge; unconditional
2 — Essential Commercial	Standard commercial; PSILP-certified contracts	72-hour; standard terms
3 — Advanced Commercial	Enhanced due-diligence categories	7-day; case-by-case approval
4 — Strategic	JIG-approved categories only	30-day review

IHTA Navigation Service Charges (Point 8)

Tier	Vessel Category	Rate	Clearance
1	Humanitarian essential (medicine, food, medical equipment)	Zero	24-hour fast-track
2	Standard commercial (general cargo, container, bulk)	\$0.15/ton	48-hour
3	Energy/premium (oil tankers, LNG, chemicals)	\$0.25/ton or \$35K flat (VLCC)	Standard with surcharge structure

Asset Return Tranches (Point 7)

Tranche	Trigger	Amount	Congressional Review
1	Signature + Day-One humanitarian freeze	25%	7-day notification; unrestricted
2	Day 30: JIG inaugurated; IAEA deployed; enrichment cap verified	25%	30-day review window; closes 'first 50%' threshold
3	Day 90: 60% Tranche 1 exported/downblended	20%	30-day review; subject to review
4	Day 180: Fordow conversion commenced; stockpile cap verified	15%	30-day review; subject to review
5	Day 365: 12 months sustained compliance; 60% Tranche 2 complete	10%	30-day review; subject to review
Reserve	Held pending any material breach determination; released on Clean Certification at Month 18	5%	JIG-administered

Negotiator Checklist

Stage	Item	Check
Before Signature	Confirm Tier 1 provisions require no preconditions (72-hour entry into force)	☐
	Verify 150-day inertia buffer + emergency fast-track exception satisfies domestic ratification concerns	☐
	Confirm Public Dignity Recitals are integral operative provisions (not mere preamble)	☐
	Identify which Optional Annexes your capital intends to adopt (independent adoption)	☐
	Review Domestic Political Disruption Hold parameters (30–60 days, benefits at 50%)	☐
	Confirm PSILP coverage for private-sector contracts (24-month post-snapback protection)	☐

At Signature	Day-One humanitarian sanctions relief activates unconditionally	☐
	Asset Tranche 1 (25%) releases to escrow; banking Tier 1 authorizes	☐
	JIG established within 7 days; crisis hotline tested; Direct Executive Link tested	☐
	IAEA baseline inspection begins; enrichment cap verified within 90 days	☐
	123 Agreement negotiations launched; fuel supply backstop confirmed	☐
	IHTA provisional phase opens; Navigation Service Charges on trial basis	☐
First 90 Days	First quarterly CTS published (WBI score, active mechanisms, benefits delivered)	☐
	Rapid Dispute Panel tested with hypothetical scenario	☐
	TSAP protocol exercised with tabletop simulation	☐
	Congressional review window for Tranche 2 (if applicable) initiated	☐
	Optional Annex adoption letters submitted (if pursuing OPT-1 through OPT-6)	☐

Remember

"Stability Through Coordinated Motion."

This accord is designed to survive domestic political transitions, contested succession, and institutional turbulence on both sides. The architecture preserves dignity for all parties, creates vested economic stakeholders across multiple constituencies, and ensures that no single failure — technical, political, or regional — collapses the entire structure. The five de-escalation layers, the 150-day inertia buffer, the human-authorized escalation ladder, and the modular Optional Annex architecture all serve one purpose: *to keep the framework in motion even when individual components stall.*

No Optional Annex automatically collapses the Core Treaty. All provisions apply symmetrically where architecturally appropriate. Every benefit is earned through verified performance.
