

FOUNDATIONAL REFERENCE DOCUMENT FOR ANNEX U

MODULAR ADDENDUM

Annex M

Territorial Baseline and Ceasefire Demarcation Protocol

Establishes the factual and legal baseline for all territorial ceilings

Self-Contained · Incorporable by Reference

Version 1.0 — Emergency Stabilization Measure

Expires automatically upon conclusion of the 60-day truce unless renewed

Foundational reference for Annex U (Technical Demarcation and Stabilization Addendum).

All territorial ceilings, breach calculations, and penalty provisions in Annex U derive from the reference points established in this Annex M.

Preamble

Whereas UN Security Council Resolution 2803 (October 2025) established a temporary ceasefire and demarcation boundary (the "Yellow Line") in the Gaza Strip, capping Israeli military control at approximately 53% of the territory;

Whereas subsequent military operations have altered the operational footprint on the ground;

Whereas the Parties require an agreed factual baseline from which all freeze-in-place and penalty provisions shall be calculated;

This Annex M establishes the authoritative reference points for all territorial provisions in Annex U and any associated protocols.

Statement of purpose: This Annex is a foundational reference document. It does not amend the parent framework or Annex U. It provides the factual and legal baselines that Annex U enforces.

Modularity Clause. This Annex M is self-contained and may be incorporated into any existing or future agreement between the Parties by a single sentence of adoption. It does not amend or supersede conflicting provisions of any parent framework unless the Parties explicitly so agree. In the event of inconsistency, Annex M's factual and legal baselines shall control interpretation of territorial provisions in Annex U and any associated protocols.

Article 1: Definitions and Reference Points

1.1 Codified Reference Points

The following reference points are hereby codified as the factual and legal baseline for all territorial provisions in the parent framework and its addenda:

Table M-1: Territorial Reference Points

Reference Point	Description	Legal Basis	Geographic Status
UNSCR 2803 Line (October 2025)	The original ceasefire demarcation boundary, capping Israeli military control at approximately 53% of the Gaza Strip	UN Security Council Resolution 2803 (October 2025)	Historical baseline; not currently operative on the ground
Current Operational Footprint (Date of Annex M signature)	The geographic area of Israeli military control as verified by satellite telemetry at 00:00 UTC on the date of Annex M signature, estimated at approximately 60% of the Gaza Strip	Verified by Shared Digital Registry (Annex U, Article 5)	Operative baseline for freeze-in-place
The 70% Directive	The public directive issued by the Prime Minister of Israel ordering the Israeli military to expand control to approximately 70% of the Gaza Strip	Public record; official government communication	Prohibited ceiling; any movement toward this line constitutes a material breach

1.2 Classified Coordinate Appendix

The precise geographic coordinates of the Current Operational Footprint are set forth in the classified appendix to this Annex M, deposited with the Joint Secretariat in Muscat and accessible to all Parties and guarantor states upon request.

1.3 Prohibition on Unilateral Alteration

No Party may unilaterally alter, reinterpret, or expand the coordinates of the Current Operational Footprint. Any adjustment requires mutual written agreement of the Parties and notification to the Joint Secretariat and all guarantor states.

Article 2: Ceasefire Baseline Affirmation

2.1 Authoritative Legal Framework

The Parties affirm that UNSCR 2803 (October 2025) remains the authoritative legal framework for the Gaza ceasefire, notwithstanding subsequent operational changes on the ground.

2.2 Acknowledgment of Expanded Footprint

The Parties acknowledge that the Current Operational Footprint (approximately 60%) exceeds the original Yellow Line (approximately 53%) by approximately 7%.

2.3 No Legal Precedent for Expansion

The Parties agree that this 7% expansion shall not be construed as a legal right or precedent for further expansion. It is acknowledged as a factual reality to be frozen, not a legal entitlement to be extended.

2.4 Preservation of UNSCR 2803 Status

Neither Party may cite the Current Operational Footprint as evidence that the original Yellow Line has been abandoned or superseded. UNSCR 2803 remains in full force except as explicitly modified by Annex U for the duration of the 60-day truce.

Article 3: Territorial Integrity and Non-Advancement Commitment

3.1 Binding Nature of Territorial Ceilings

The Parties affirm the principle that territorial ceilings established in internationally brokered ceasefires are binding obligations, not negotiating floors.

3.2 Inconsistency of the 70% Directive

The Prime Minister of Israel's 70% Directive is hereby acknowledged as inconsistent with the territorial integrity provisions of UNSCR 2803 and the parent framework.

3.3 Commitment Not to Implement the 70% Directive

The Government of Israel affirms that it shall not implement, execute, or take any steps toward the 70% Directive for the duration of the 60-day truce. Any movement beyond the Current Operational Footprint shall be treated as a material breach under Annex U, Article 3.

3.4 US Commitment to Ensure Compliance

The United States, as the primary broker of UNSCR 2803 and the parent framework, affirms its commitment to ensuring compliance with this Article and shall use its diplomatic and, if necessary, economic leverage to prevent advancement beyond the Current Operational Footprint.

Article 4: Lebanon Front Territorial Baseline

4.1 Verification Sources for Lebanon Baseline

The territorial baseline for the Lebanon front (southern Lebanon, Blue Line) shall be the status quo ante as of the entry into force of the parent framework, as verified by:

- UNIFIL ground patrol reports
- Israeli military intelligence assessments shared through the Tel Aviv Channel (Article 16 of the parent framework)
- Lebanese Armed Forces liaison reports
- Satellite telemetry deposited in the Shared Digital Registry (Annex U, Article 5)

4.2 Blue Line Non-Advancement Obligation

No Party shall advance, reposition, or expand military presence beyond the Blue Line as defined in UNSCR 1701 (2006) and subsequent implementing agreements.

4.3 Automatic Breach for Blue Line Violations

Any violation of the Blue Line territorial baseline shall be treated as an automatic breach under Annex U, Article 3, with consequences proportional to the scale of the violation as determined by the Shared Digital Registry.

Article 5: Relationship to Annex U and Other Annexes

5.1 Foundational Status

Annex M is the foundational reference document for Annex U. All territorial ceilings, breach calculations, and penalty provisions in Annex U derive from the reference points established in this Annex M.

5.2 Interpretive Hierarchy

In the event of any inconsistency between Annex M and Annex U, Annex U's operative provisions shall govern, but Annex M's factual and legal baselines shall control interpretation.

5.3 Conjunction with Appendix E

Annex M operates in conjunction with Appendix E (Lebanon and Levant Front Stabilization Protocol) of the parent framework. Any territorial violation on the Lebanon front shall be treated as a violation of Appendix E.1 (Proxy Operational Pause) with all associated consequences.

5.4 No Amendment of Parent Framework

Annex M does not amend the parent framework. It is a modular, self-contained addendum that establishes the factual record for all territorial provisions.

Article 6: Shared Digital Registry Integration

6.1 Encoding of Baselines

All reference points established in Annex M shall be encoded in the Shared Digital Registry (Annex U, Article 5) as immutable baselines.

6.2 Historical Record Maintenance

The Shared Digital Registry shall maintain a rolling 90-day historical record of all territorial movements relative to the Annex M baselines.

6.3 Automated Geolocation Determination

Any Party may query the Shared Digital Registry to determine whether a specific geographic coordinate lies within, at, or beyond the Current Operational Footprint. The Registry's automated geolocation tool shall provide a binding preliminary determination within 15 minutes.

Article 7: Amendment and Review

7.1 Amendment Procedure

Annex M may be amended only by mutual written agreement of all Parties and ratification by the Joint Secretariat.

7.2 Technical Review Cycle

The geographic coordinates of the Current Operational Footprint shall be reviewed every 30 days by the JIG to ensure accuracy. Adjustments for technical correction (e.g., GPS drift, mapping errors) do not require amendment.

7.3 Formal Review Request

Any Party may request a formal review of the Current Operational Footprint coordinates if it believes the footprint has changed due to unrecorded military movements. The JIG shall respond within 48 hours with an updated telemetry assessment.

Article 8: Incorporation by Reference

8.1 Incorporation Clause

This Annex M may be incorporated into any existing or future agreement by the following sentence:

"The Parties adopt Annex M (Territorial Baseline and Ceasefire Demarcation Protocol) as the foundational reference document for all territorial ceilings, freeze-in-place provisions, and breach calculations in the parent framework and its addenda. Annex M's factual and legal baselines shall control interpretation of Annex U and any associated territorial protocols."

8.2 Entry into Force

No amendment of the parent framework is required. This Annex M enters into force upon signature by both Parties or upon provisional application by exchange of diplomatic notes.

Article 9: Provisional Application

9.1 Provisional Application Period

The Parties may apply this Annex M provisionally for 90 days, pending formal incorporation.

9.2 Termination of Provisional Application

Either Party may terminate provisional application with 14 days' written notice. Termination does not affect territorial baselines established prior to termination; those remain authoritative for any breaches that occurred during provisional application.
