SUBJECT: Supplementary Declarative Baseline for the Late May 2026 Framework

CLASSIFICATION: Public Ministerial Release Note // For Immediate Dissemination

MINISTERIAL STATEMENT ON STRATEGIC NON-PROLIFERATION INTENT

Pursuant to the finalized 14-article Memorandum of Understanding aimed at establishing an immediate cessation of hostilities, port blockades, and maritime transit stabilization, the Facilitating State issues the following definitive declaration of strategic intent to serve as the baseline for all subsequent 30-to-60 day technical implementation tracks:

I. Affirmation of Non-Proliferation Principles

The Facilitating State explicitly reaffirms its long-standing strategic, legal, and doctrinal commitments under the international Non-Proliferation Treaty (NPT) framework.

II. Declaration of Capabilities Intent

In alignment with its established peaceful nuclear architecture, the Facilitating State formally and categorically reiterates that it has never sought, does not currently seek, and will under no circumstances ever pursue, develop, or possess nuclear weapons capabilities or related explosive devices.

III. Integration into the 60-Day Technical Track

This declarative baseline is accepted by the mediating parties as a binding statement of intent under which the Joint Compact Commission (JCC) shall convene the secondary 30-to-60 day technical verification and safeguards synchronization window, subject to the automated default thresholds established under the core framework.

* * *

Issued by authority of the Neutral Facilitator for immediate distribution to all signatory parties, accredited diplomatic missions, and relevant international oversight bodies. This declaration constitutes a public ministerial release note and shall be disseminated as an official standalone instrument supplementary to the core Stability First Enhanced Accord framework documentation.
